DEATH - THE ETERNAL TRUTH OF LIFE

The ‘DEATH’ that comes from the German word ‘DEAD’ which means tot, while the word ‘kill’ is toten, which literally means to make dead. Likewise in Dutch , ‘DEAD’ is dood and “kill” is doden. In Swedish, “DEAD” is död and ‘Kill’ is doda. In English the same process resulted in the word “DEADEN”, where the suffix “EN” means “to cause to be”.

We all know that the things which has life is going to be dead in future anytime any moment. So, the sentence we know popularly that “Man is mortal”. The sources of life comes into human body when he/she is in the womb of mother. The active meeting of sperm and eggs, it create a new life in the woman’s overy, and the woman carried the foetus with 10 months and ten days to given birth of a new born baby. When the baby comes out from the pathway of the vagina of his/her mother, then his/her first cry is depicted that the new born baby is starting to adjustment of of the newly changing environment. For that very first day, the baby’s survivation is raitained by his/her primary environment. But the tendency of death is started also. In any time of any space the human baby have to accept death.

Not only in the case of human being, but the animals, trees, species, reptales has also the probability of death. The above mentioned live behind are also survival for the fittest.

DEFINITION OF DEATH

Death is defined as, “the action or fact of dying or being killed; the end of the life of a person or organism. It is defined philosophically. In scientifically death defined as, “The permanent ending of vital processes in a cell or tissue”.

Death is the cessation of all biological functions that sustain a living organism. Phenomena which commonly bring about death include aging, predation, malnutrition, disease, suicide, homicide, starvation, dehydration, and accidents or trauma resulting in terminal injury. In most cases, bodies of living organism being to decompose shortly after death.

DEATH- Particularly the death of humans- has commonly been considered a sad or unpleasant occasion, due to the affection for the being that has died and the termination of social and familial bonds with the decreased. Other concerns include fear of death, necrophobia, anxiety, sorrow, grief, emotional pain, depression, sympathy, compassion, solitude, or saudade. Many cultures and religions have the idea of an after life, and also hold the idea of reward or judgement and punishment for past sin.

Clinical Death- Clinical death is a medical term for cessation of blood circulation and breathing, the two necessary criteria to sustain human and many other organisms’ lives. It occurs when the heart stops beating in a regular rhythm, a condition called cardiac arrest.

DEATH BY NATURAL CAUSES- A death by natural causes as recorded by coroners and on death certificates and associated documents, is the end result of an illness or an internal malfunctioning of the body not directly caused by external forces. For example, a person dying from complications from influenza (an infection) or a heart attack (an internal body malfunction) or sudden heart failure would be listed as having died from natural causes. Although the old age death may be unknown in certain cases and could be one of the number of aging associated diseases.

STAGES OF DEATH BY KUBLER ROSS- The KUBLER-ROSS model is popularly known as FIVE STAGE of grief postulates a progression of emotional state experience by both terminally ill patients after diagnosis and by loved ones after a death.

The stages popularly known by the acronym “DABDA”, include –

1. DENIAL –The first reaction is denial. In this stage, individual believe the diagnosis is somehow mistaken, and cling to a false, preferable reality.
2. ANGER-When the individual recognizes that denial cannot continue, the become frustrated, especially at proximate individuals. Certain psychological responses of a person undergoing this phase would be: “why me? It’s not fair,” “How can this happen to me?” “Who is to blame?” “Why would this happen?”

3. BARGAINING – The third stage involves the hope that the individual can avoid a cause of grief. Usually, the negotiation for an extended life is made in exchange for a reformed lifestyle. People facing less serious trauma can bargain or seek compromise. For instance: “I’d give anything to have him back.” Or, “If only he’d come back to life, I’d promise to be a better person!”

4. DEPRESSION – During the fourth stage, the individual despairs at the recognition of their mortality. In this state. The individual may become silent. Refuse visitors and spend much of the time mournful and sullen.

5. ACCEPTANCE – In this last stage, individual embrace mortality or inevitable future, or that of a loved one, or other tragic event. People dying may precede the survivors in this state, which typically comes with a calm, retrospective view for the individual, and a stable condition of emotions.

PARAPSYCHOLOGY – Parapsychological investigation of the after life includes the study of haunting, apparitions of the decreased, instrumental trans-communication, electronic voice phenomena, and mediumship. But also the study of the near death experience. Scientist who have work in the area include Raymond Moody, Susan Blackmore, Charles Tart, William James, Lan Stevenson, Michael Persinger, Pin van Lommel and Penny Sartori among others.

But after 25 years of parapsychological research Susan Blackmore came to the conclusion that there is no empirical evidence in after death.

CONCEPT OF THE GHOSTS VS. HALLUCINATIONS-
The Hallucination is defined as that “A sensory experience of something that doesnot exists outside the mind, caused by various physical and mental disorders or by reaction to certain toxic substances, and usually manifested as visual or auditory images.”
The Hallucination is also defined as, “The sensation caused by a hallucinatory condition or the object or scene visualized”.
In Schizophrenic patient and Paranoid patient has the habit of hallucination. The Psychologists are said that the concept of ghosts were come from the Hallucination process. They can accept the concept of soul or spirit but not the ghosts. The Psychoanalytic Sigmund Freud also said that “We see something supernatural thing due to the work of human’s sub consciouss mind. The excessive fear about ghosts was lead to the people to observe the presence of ghosts. When we watch sometype of horror movie, then we fear about the ghosts in the night time.
Parapsychologists are often told that people observed the ghosts in dark place or in the night time, but if there is the concept of ghosts really, then it will be seen in the day time also, and it will be seen in the several people also.

CONCLUSIONS-
In the above mentioned discussion we all came to know that life has an end which is called death but when the death is come near us we all scared of death. After death we all believe that there is a place where spirit goes. The two places of after death are Heaven and Hell. The good spirits are gone to the Heaven and the bad spirits are gone to the Hell. After several years spent there the living being are comes in the earth again for their re-birth. But the concept of that spirits which are evil, they couldn't taking re-birth and they moves like a demon or ghosts. But Parapsychologists are given various logic about the ghosts and they defined it as hallucination held in human mind as a mental problem.
Everything has an end. For this living beings are accept the death and the society accept the birth of the infant for fresh living beings.
