We are living in an inquiring and innovation – oriented society. The demand of 21st century is novelty, creativity and integration of knowledge at global level research, critical and analytical thoughts. Rapidly social changes are creating uncertainly and complexity in the society. To prepare the children and youths to cope with present situation needs to develop analytical and critical thinking skills and attitude that would make them more flexible and innovative to deal with uncertainty and crises at national and global level. The greatest need of the hour is to redesign curriculum, text books, teaching methodology and children literature, formal and non-formal education system.

VALUE OF EDUCATION

- Education is the tool which can inculcate national and cultural values and literate people of false prejudice, ignorance and representations. It provide them required knowledge, technique, skill and information and enables them to know their rights and duties towards their family, their society and towards their mother land at large.
- Education sustains the human values which contribute to individual and collective well-being. It forms the basis for life long learning and inspires confidence to face challenges. It provides the skills to individuals to become more self –reliant and aware of opportunities and rights.
- Education expands their vision and outlook, provokes the spirit of healthy completion and a desire to advance for the achievements of their consciousness regenerating truth and their capability to fight ignorance, injustice, corruption, violence disparity and communalism.
- Education is the key which allows people to move up in the world seek better jobs and ultimately succeed in the their lives.
- Education strives to banish social evils, blind customs and traditions through various social reformation projects political movements, social service schemes and also tries to bring in needed social changes and reforms.
- Education promoting capacity to welcome and accept social change, education propagates in the society both the materialistic and non materialistic techniques. It prepares the mentality of people to welcome and adopt desirable social changes easily and gladly.
- Education promotes in the individuals the capacity to increase their areas and scope of knowledge more and more for their benefit. It open new vistas for deeper and deeper investigation and researchers, which bring about desirable changes in material as well as non material aspects of culture. Thus education prepares ground for the advent of social change.

Education is the complete development of individuality of the child, so that he can make his original contribution to human life according to his best capacity

Education is important from various points of view. Its field of activity is so wide that all activities and experiences are embraced in its sphere of work. Essentially its is a process of development, a development of the talent capacities of a child to the fullest extent. It sublimates the animal basic instincts in a child to socially useful activities, habits of thinking and behaving.
