**Keywords:** *organic food, dishes, spices, salads and kabobs.*

## INTRODUCTION

This article is about organic curry sales and purchase in an e-commerce manner. Normal sustenance's created from the earliest starting point an agriculturists' market in Argentina Normal sustenance will be sustenance passed on by methods that agree to the guidelines of customary creating. Checks change far and wide, yet typical building up all around highlights hones that endeavor to cycle assets, advance natural adjust, and screen biodiversity. Affiliations supervising trademark things may limit the utilization of specific pesticides and manures in creating. Everything considered, typical sustenance's are correspondingly for the most part not dealt with utilizing illumination, mechanical solvents or assembled sustenance included substances.

At appear, the European Union, the United States, Canada, Mexico, Japan, and different particular nations envision that makers will get extraordinary assertion recalling a definitive goal to plug sustenance as consistent inside their edges. Concerning these controls, normal sustenance is made in a way that agrees to trademark benchmarks set by neighborhood affiliations, national governments and general affiliations. Despite the way that the pass on of kitchen greenery separated regions might be normal, offering sustenance with a trademark stamp is composed by administrative sustenance security masters, for example, the US Department of Agriculture (USDA) or European Commission (EC).

There isn't agreeable insistence in remedial arrangement to help proclaims that normal sustenance is more secure or more productive than routinely made sustenance. While there might be two or three contrasts in the supplement and against supplement substance of regularly and traditionally passed on sustenance, the variable idea of sustenance age and overseeing makes it hard to entire up results Claims that normal sustenance tastes better are for the most part not kept up by evidence.

In the existing if we need curry we must have to go for curry point and if we want to buy a curry prepared with organic vegetables there was a little stalls will available and we don't know where exactly those points locations. There are less number of curry points are available about organic foods. There is no home delivery available. to over come this drawbacks we introduced Currybank which is online curries purchase application system. by using this application we need not to worry about location of an the purchase shops we simply order curries using this app and we will buy curries.

## Proposed Scheme :

Here we designed Curry Bank application for selling organic foods . If any person wants to invest a curry point this application is so useful to them here they need not to worry about the investment .they post their curries here if anybody is trusted about that particular curry they will make a call for seller to buy that at the same time that user can able to post curries .

- The very first advantage is the seller need not to worry about investment of Curry point.
- The user need not to worry about location where the curry point is .

## MODULES DESCRIPTION:

### Admin:

Admin can able to view curries which is added by users and he can able to delete those curries. and also he can able to maintain users like viewing and removing actions.

### User:

user can add curries as well as he can able to view curries if he need to buy those he can make a call to required person to buy curry. and also he can able to post a curry for sale. if he needs to delete that he can able to that operation also.

### Login activity:

Here all the users admin, user curry provider must have to login in this page .Here they have to enter their username and password

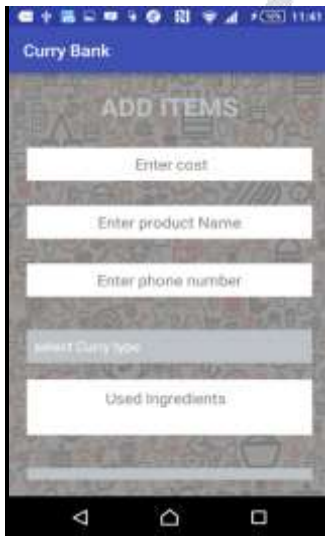

**User home:**

after registration user can able to login, after login the users home willl appears like this here user cab able to view

**Curry Provider Home:**

This is the page where the curry provider can add curries.

Here the user can view their organic curries to buy.

**View Items:**

here provider can view all the curries which application had.

After selecting a specific item then it will shows the details like this

If we click on call person it will call to the specific provider who is added that curry.

## CONCLUSION

This application deals with organic foods selling in online here we have two modules admin and user .user can able to view

curries and he can able to post there curries to. if he needs to delete the previous curry he can able to do that also. if any of the user interested to buy our curry he will make a call to us. And admin can able to perform actions like viewing users and curries and deleting those.
