

# Save Onion producers in India, Save Indian Economy

Prof Debabrata Roy ,Principal ,  
Government Degree College Teliamura

*Abstract* : This study has been undertaken to investigate the determinants of stock returns in Karachi Stock Exchange (KSE) using two assets pricing models the classical Capital Asset Pricing Model and Arbitrage Pricing Theory model. To test the CAPM market return is used and macroeconomic variables are used to test the APT. The macroeconomic variables include inflation, oil prices, interest rate and exchange rate. For the very purpose monthly time series data has been arranged from Jan 2010 to Dec 2014. The analytical framework contains.

## I. Introduction

The only way remains for Government of India at last to act now with these following measures immediately to save the onions producers in India and the country's economy.

Onion producers are always deprived from their right/plight and they should get their legitimate right of having direct entry into the Mandi or Sabji market even with the help of police (where necessary) to sell their products directly or through govt. or through cooperative agency or by setting up of self counter in the market corner in order to eliminate the middlemen who are destroying the country's economy since time immemorial.

Each and every government are acting on different ways far from the reality for which the govt could not save the life Onion producers and the health of country's economy. All though two earlier governments got severe jolt over the onion issues still the central government is in deep slumber.

Govt. should not think on loan waiving for every Kishan of the country irrespective of any agricultural field rather govt. should enforce or enact such stringent law for the banks to regulate all banks to reduce the rates of interest of Agricultural Loan as minimum as 1% or 2% which is quite far better than becoming with all loans to be marked as NPA after sometimes due to hefty interest rates . All previous government did cosmetic surgery of this loans but not cured the diseases.

Because concept of loan waiving is not only the ultimate solution for any welfare government , because loan waiving will destroy the mental stamina of the farmers for being survived which not only destroy the tax payers money but it will also harm country's solid economy.

Here bank should act with the concept of no profit no loss theory for country's development even these banks should work with minimum operational profit at the cost of agriculture and rural economy.

Frequent loan waiving therapy will make the Kishan idle which we have seen in earlier like USSR so the government should act immediately otherwise we will have to face the similar consequences likewise erstwhile USSR.
