Affiliate System is a type of performance-based marketing in which affiliate user can be rewarded for one or more affiliate's clicks for each visitor or customer brought.

2. Problem Definition

The necessity to constantly improve various processes of online fax for the products also includes increased participation in decision-making in the market environment. The quality of decision-making at the university is premised on the participation of all sectors. It is not possible to search for the product every time on various website so and search for the prices and all the stuffs so it is being there on a single portal where you can connect with the people who has actually bought the same and ask for the genuine reviews of the product gives you the real time experience so that you can get rid of all the fakes reviews and deal in the environment of the genuinity to improve your purchasing and have the real time interaction and communication with the people.

3. Proposed System

Affiliate Social Media Fax Portal (ASMFP) emphasizes on the terms data mining and data analysis. For these to incur we will be focusing on development of a buying system, this will include a survey bot consisting of an interactive UI that will indulge the audience to interact with the bot by answering the questions raised by the bot which will be distinctive for particular audience.

4. Literature Review

4.1 Existing System

- **Doesn't allows people to communicate with each other and hence doesn't provide real time experience**

We put the project in the Initial testing and get that done by the users from US and various other places from our connections. And based upon the analysis and reports it says that there is a lacking of authenticity over the website.

- **A Survey on problem of buying genuine product in the US**

A survey is conducted based upon the connections we have overseas and got the response that it's really a problem to buy the genuine products

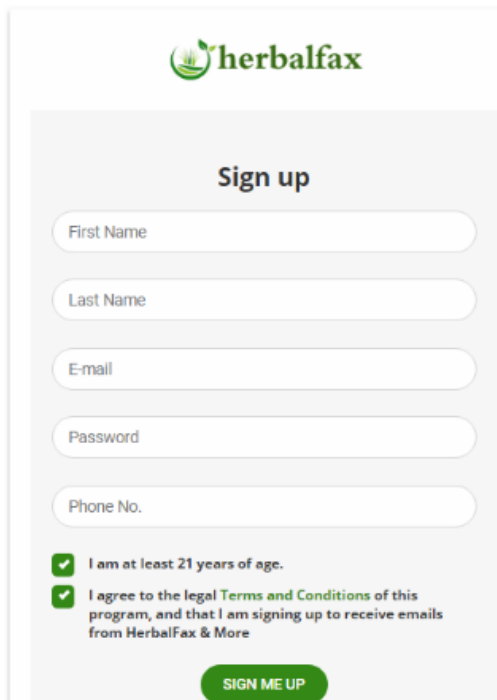

4.2 Disadvantages of Existing System

The disadvantages of the existing system are:

- Allows to make the reviews over the system to customer and that may be for marketing purpose and no one can connect with the other person individually.
- Customer may not be fully aware about the buyer and the experience he/she actually had in the same
- Cannot have the real time discussions and one on one chat with the others.
- The system is made available in the US market.

5.Modules

Search by Distance

Search by Location

3. Event Module

6. Conclusion

The necessity to constantly improve various processes of online fax for the products also includes increased participation in decision-making in the market environment. The quality of decision-making at the university is premised on the participation of all sectors. It is not possible to search for the product every time on various website so and search for the prices and all the stuffs so it is being there on a single portal where you can connect with the people who has actually bought the same and ask for the genuine reviews of the product gives you the real time experience so that you can get rid of all the fakes reviews and deal in the environment of the genuinity to improve your purchasing and have the real time interaction and communication with the people.

The logo is a shield-shaped emblem. At the top, the word 'JETIR' is written in a large, bold, serif font. Below it, the word 'REFERENCES' is written in a smaller, bold, sans-serif font. The central part of the shield features a stylized flower or star shape with five petals in different colors: red, cyan, blue, yellow, and green. The entire shield is surrounded by a laurel wreath. The logo is semi-transparent and serves as a watermark for the journal.
