

# A STUDY OF DEMONETIZATION

Dappu Nagarani, Master of Business Administration,

Dr M Pavani, Associate Professor, Department of Master of Business Administration,

Malla Reddy Engineering College and Management Sciences, Medchal, Telangana – 501401.

## ABSTRACT

Another work is on elected democratic researchers in the United States. They try to find and search for processes of demonetization that take place in some international places. The basic idea of selecting topics was due to the nature of the impact and the importance of awareness in various nations. Designers have been hearing about black money, corruption, and terrorism in the country.

Making money is like taking out foreign currency in a normal way or deleting or canceling some Forex images. Not always when I decided that money in the country was generally not used.

There is a way to live on an island with a wireless network.

The money currency taken by the government, which is supposed to be used to exchange foreign currency, is known as popularity and the old currency is now replaced by the new Forex currency, popularity. The purpose behind the stigma of politics is as follows; First, we try to make it a little worse. Second, it is the fourth largest black money supply, up to three percent of distant inflation, and the fourth is that the forest is run by illegitimate interests, ultimately seeking miles to improve people.

In data analysis, an international gender location is captured that provides the same information for intelligence:

1. Pakistan
2. Zimbabwe
3. Australia
4. India

All of the international earnings have been described above and what kind of steps are being taken to make your internship as an international vacation a job.

Academic methods are the forms of truth that are involved in homework. By working with me, I try to find the information I need from the high school tempheh, the internet, a paper researcher, government courses, books, etc.

Analyzing data is part of my intention to conduct a comprehensive analysis of five international sites of the same genre. All records analyzed in this project are based on data collected from the second records.

The country has already been involved in Pakistan's anger lawsuit. DESTINOS are responses of the poor and unable to reduce black money and false carriers. system and in the case of Australia, the country was successfully merged. They are not subject to change, claiming that they are only changing details and registering the police and that they have no effect on the financial system. In the case of India, according to a new RBI report, the bank removed a large percentage of nods and a large percentage of denominations from the recession. Before being tricked by the devil, who believes that approximately 20% of the information (black money) will be returned. Give this perspective when the devil enters the fold.

## 1. INTRODUCTION:

Ceremonial shaking action is a popular forex unit like criminal justice. In any case, there is a change for the rest of the country: the modern form of payment or retirement or retirement, which is often

replaced with new cards and coins. Sometimes the country completely returns with its old currency and its new Forex.

Along with the deceptive demons, the old coins are replaced by new fields or coin transfers. Reasons and there are reasons why the devil makes rustic coins; another reason to measure inflation, reduce corruption, and improve intelligence activities.

Money, the name of money is the exchange of jobs and businesses and is also the basis for the use of inside information. Money flows through a rustic path through the financial system. But it is seldom implemented through the democratic authorities, known as the foreign currency law, through the state of the sanctions implemented and an old Forex instrument created by the newly created Forex. Demonetization such information is usually in the form of lies, currencies, and fraudulent monetary terrorism.

Demonetization immortal because the signs and promises are valid, which means losing money is better communication and worthless once stored in the bank. When it is no longer there or not scoring, it's ready from any foreign currency forward and as a soft disk. Creating a foreign currency is borrowed money. This is the circle and did not need much time to restart, but requires replacement or replacement of foreign currency, and the new

**Scope of the study:** This job you can do in a country of your choice will gain knowledge of demonetized methods. The area of analysis is related to the results of democratically elected countries. Democratic tactics are right and having the signature is not a valid promise, it does not mean that what he saw lost money and valuable data is useful when talking to the bank.

In the end, it is easy to think that he chose this topic, especially because of the general nature and influence of several nations. The move focused on ending black money, corruption, controlling inflation, financial activity, and terrorism in the country. The decision on a system of consensus with democratic justice is something that is no

management is designed. It is also effective for the authority in the economy as well, as the cost of bread rises.

Consult negotiations about the process of capturing a demon rather loaded. Usually back strong against foreign countries generally have heads as the country began to learn from the foreign currency that they develop and form a new competition. Foreign currency

Is it? Why democracy is too small events without a public opinion? But, in the case that often, people do not comments Soon-old and another first down only accept changes slowly and stop the use of foreign. This is true especially when the authorities allowed some time to keep prisoners in prison.

But he opposed, as opposed to the payment method he had considered legal.

#### Objectives of the study:

- The purpose of the investigation:
- Understand the demonetized concept.
- The operating conditions are selected on the issue of democracy.
- A look at the impact of Indian demonetization.

small mistake. Is demonetization less likely to result in some areas without public protests? The goal is usually to make money, and the nation usually understands the money when people start working 1 and make new money at the same time.

Efforts to allow the country; First is to make the mill. The work is free. Second, they ended the mile to raise black money, the first three to raise push rates, four to sell for various illegal activities, the other a great effort to build communities that have money.

The analysis was insufficient to undermine the democratization process and the effect of the democratic process on several international websites.

## 2. LITERATURE SURVEY

The researcher's analyzed Mali demonetized one more step towards more updates in India. This article discusses the non-profit Demonic Center that keeps the government motivated and the result is one of the sectors in India. Demonetized previous appearance of various sectors such as organization sectors and elsewhere has resulted in an intersectoral impact in the retail space, which has resulted in the decline as better organization of small businesses such as group than seasonal in which cash. Yes. The sectors that have been grouped by observations that I think may have the effect of a magnetic base.

They find it irrelevant that demonetized has a huge impact and negatively on various sectors, but in the long run, it can have a powerful effect on controlling black money and fake money.

Demonstration tests conclude that in the short term it can free up sectors such as luxury goods, luxury goods, gold and silver, and non-profit industry partners. This step can lead to economic growth, taxes are closer, improving financial stability, reducing inflation, the level of corruption is lower, which eliminates more deception money and Rock ahead another.

K. Veerakumar researchers analyze research on the effects of human democracy. The magazine was trying to discover the impact of grazing demons in public. There is practice and spread in the Indian economy. The reason for the exploitation of the soul is looking for signs of counterfeiting that can help or destroy terrorism and destroy the "black market".

Investigators concluded that the violation of the plan for more tribes is led by a good government issued. Demon Trigger takes place in various stages like tax evasion, wrong and illegal investment game. Some people have withdrawal symptoms of currency cards without delay in a bank account, indicating that income is not

guaranteed, the problem of high taxes, and a variety of effects. Alternative payment methods, including e-wallet, online banking, e-banking, credit, and consumer credit has improved and this may change the intelligence infrastructure.

## 3. RESEARCH METHODOLOGY

### 3.1 INTRODUCTION TO RESEARCH DESIGN

A research design is a set of methods and procedures used to collect and analyze measurements of variables that contain the problem of teaching and research. Design defines the design problem (descriptive, correlational, semi-experimental, experimental, revised, meta-analytical) and the research subtype (for example, descriptive, longitudinal trials), hypothesis, independent variables, independent and dependent, and experimental design. If relevant, data collection methods and statistical analysis plan design research is a framework that worked to find answers to the questions that researchers.

### 3.2 STATEMENT OF THE PROBLEM

Efficient and parallel efforts are evident from the fact that although the massive resources, police, regulators, RBI, CBI, international organizations, the tax department, etc. Conduct them to eliminate this group, they continue to prosper. The serious questions that arise in this time: if monetary tools we can to combat demonstrations parallel economy are very motivated? If the machine's executive produced to overcome these economic offenders? Answers to these questions are not as simple as YES or NO.

Parallel with economic expansion, growth must be reduced, there must be a priority and tactics to route the various enforcement efforts to reduce the threat and impact of economic parallel. Practical administrative issues must be related to increased efficiency in the war against the parallel economy.

Demonetized is the process when the government announced that tickets are not valid to be tender

and have a direct and important impact on the Indian economy-wise. The main reason is democratic control or eliminates the "black economy." Hence, in this research, efforts are made to find the demonstration effect on group income and lower-middle.

Therefore the study addresses the following issues:-

- Elimination of black money from the country.
- Promotion of cashless economy.
- The decision to issue higher currency notes of Rs 2000.

### 3.3 SCOPE OF THE STUDY

Impact of demonetization on the people belongs to the middle class and low income, the study is limited to the areas of Bangalore.

### 3.4 HYPOTHESIS

1. H0: There is no relationship between demonetization and black money.

H1; There is a relationship between demonetization and black money.

2. H0: There is no relationship between money and demonetization less money.

H1: There is a relationship between demonetization and financial reduction.

3. H0: The demonetization of the middle-income group is not affected.

H1: This is a demonstration effect in the middle-income group.

- We will investigate whether there is a difference between the attitude of the bank officials and the public to make a free money system. Variables in the system without money is a point that is derived from the responses of several articles about the frequency in which professionals ace on

the course without cash, such ideas are not using the money when the movement to monetize this test. Mann-Whitney applied.

- I am interested to find a recipe that is not a method to reduce the parallel economy without demonetization movement. I believe that having a democratic movement in the country can reduce the parallel economy.
- To investigate this, I ask the various participants to measure the size of government is different after the demonetization movement.
- Test Krushal Wallis among professionals and agencies work very hard to stop the parallel economy.
- Examining the attitude Wallis Krushal the other to take care of bills and false professions do not.
- Examining the relationship between age and attitude towards the universe after the demonetization movement.
- Spearman correlations between classification done to determine the relationship between literacy and technical crime and corruption.
- Correlation Spearman's classification made to determine the relationship between the financial systems is financially honest and digitization.
- Correlation Spearman's classification made to determine the relationship between the reduction in bad economic ideas parallel and banned bill 500-1000.
- There is no relationship between demographic factors such as age, income, etc. with the implementation of the policy of demonetization.
- There is no relationship between different professionals and Demonetization.
- A parallel economy is not important enough to be considered seriously.
- The parallel economy does not affect the economy and the financial system of the economy.
- Demonetization as a tool for monetary

policy failed to checkmate economic parallel.

- Demonetization causes a loss of confidence in the monetary system of India.
- Demonetization causes a decrease in the industry.
- Demonetization follows industry and trade, which resulted in a drop in the investment industry.
- There is no doubt that the presence of black money has a significant impact on the level of social, economic, and political life in us, who have a crucial impact on the government and the conduct of public policy in the country.

### 3.5 RESEARCH METHODOLOGY/ RESEARCH DESIGN

The study is descriptive purposes are accurate to describe the characteristics of the group, community, or society. Researchers also concerned about discrimination in the proportion of people in a given population who have an idea and attitude that would.

#### 3.5.1 SAMPLING DESIGN

The population will be people who belong to different groups of middle and low income.

#### 3.5.2 SAMPLING PLAN

It is the process of selecting the units from a population of interest so that by studying the sample we may fairly generalize our result back to the population from which they were chosen.

#### 3.5.3 SAMPLE SIZE

Example 50 respondents will be capped based on a questionnaire

#### 3.5.4 SAMPLING TECHNIQUE

Employee selection will be based at random using random sampling techniques are easy.

### 3.5.5 TOOLS FOR DATA COLLECTION

Information collected through the primary interaction Bank officials and government officials, academics, community, LIC through survey forms through Google and questionnaires.

Secondary data: data collected through the secondary site.

### 3.6 SOURCE OF DATA

Primary data was collected for those who began and, therefore, genuine. Primary data can be collected through an experiment or studies.

Secondary data easily accessible and accessed by the public through publications, magazines, and newspapers.

#### Primary Data

- Data is composed of information that is collected through the interaction with the staff questionnaires and group income is different.
- The observations are used to understand the level of awareness level of impacts of demonetization.

#### Secondary Data

Data collected from the data that has been published and available on the Internet, writing, writing, journal there, various books on the monetary system, etc.

### 3.7 PERIOD OF THE STUDY

The study was conducted for a period of 2 months (Feb 2017- April 2019)

## 4. DATA ANALYSIS & INTERPRETATION

Countries following the haves and democratic functioning are:

Pakistan

The federal official Republic of Pakistan in the Republic of South Africa is in Central Asia and West Asia.

Pakistan's economy figures are the most famous in the region of 24 power purchases in the most important areas with the largest 41-per GDP

(World Bank). Used with economic growth and development more quickly and is supported by one of the middle-class and high growth. Faced with a difficult problem, and not ignorant, health care and corruption, although already suffer from poverty, terrorism lessened by the increase in income. Pakistan's economic system has been transferred from the main base of agriculture and trade consistently.

Pakistan has one of the lowest literacy rates in the world and according to the UN agency for Science, Culture, and Culture (UNESCO) is 55 percent and Pakistan is 160.

Pakistan's economy is open for business, it is important for the economy of Pakistan. The value of exports and imports combined is 28% of the GDP. The average cost of the rush is 8.9%. A system of rules and regulations can direct investment by foreign companies and governments' access to the economy. In Pakistan, the number of credit cards issued increased slightly but the number of credit cards has been used in recent years. However, the number of ATM and credit cards has increased.

### **Demonetization of Pakistan**

#### **Step Taken: – June 2015**

Pakistan's government announced a democracy of Rs.5 and Rs.500 in June 2015 to accelerate the impact of the union of all other libraries. Pakistani people have updates on record this year and, after his death (December 1, 2016) will mark canceled.

### **Interpretation**

In economics is not official as Pakistan, democracy will have a large impact because when cooperation becomes financially activities to reduce the negative economic data that will be dropped and the business will fall. Pakistan is very different from India when it comes to the formal and informal economy in both countries.

Please note in the process of democracy in Pakistan better for banks to continue to transition toward digitization in the financial system. This size at the same time increases the level of documentation in the economy and will help to increase the tax in Pakistan is very low at the time.

The main objective of the government of Pakistan is to prevent fraud and black money, but he took year and a half years to collect coins devil in a bank owned by the state of Pakistan. During this time very high and is the main reason that he can change the goal of democracy in Pakistan. During this time, it becomes black money you can use several means of transport and hide from authorities.

## **5. FINDINGS OF THE STUDY**

### **FINDINGS:**

This study aims to analyze the impact of democracy in different countries. Details of the analysis of results from the five countries in the country's financial and economic situation are different. The following is a description of a good search.

- Earnings are implemented to improve the financial condition of the economy and the country. It is the process of removing coins from the use of common, close, or exchangeable coins. The movement in this country refuses to pursue black money, corruption, and terrorism.
- As is the case with Pakistan, due to the lack of democratic consciousness in society about denial of money and answers is not happy in society. It took them half a year to gather money-making activities like democracy with a country bank in Pakistan. During this very high and that is the main reason why he cannot leave the balance in Pakistan and cannot get the black money or give signals and vice versa.
- Zimbabwe's democratic processes have failed because of the persistent inflation in Zimbabwe's economy and they have decided to

replace the Zimbabwean dollar with the American dollar.

- On the Australian side, the country was successful in the work of demonic winds. Australia intends to create a false token to prevent and reduce bankruptcy due to the loss of paper currency. They get nothing without change since it just changes the bank's name into polymers and has no financial impact.
- In the case of India, 98.86% received the symptoms of a major denomination in the bank, according to a new RBI report. Before being struck by a demon, the official estimate is about 20% of the mark (meaning black) will return.

## 6. CONCLUSION

Demonstration researchers and references to selected countries to explore the country and the memory of democracy

### 1. Pakistan:-

- Has time to pay.
- Before being possessed by demons, basic behavior is rare.
- How true it was to complete the transaction with illegal payment
- The times of protest are not economic benefits.

### 2. Zimbabwe:-

- In an economy at a time when democracy is not true.
- The long-term effects of currency exchanges are not good.
- Lack of public response due to a lack of democracy.

### 3. Australia:-

- The main reason for the Presidency for this is the change in the currency sheet.
- They do nothing without change, they just change the name of the bank as polymers and have no financial impact.

### 4. India:-

- The main purpose of democracy in India is to control corruption.

- Certainly influential democracy; that is, some are interested in the process, not claiming that when the Indian government confirmed that there was corruption in the process.

In my opinion, the best outcome is the transition of prominent citizens from India into the banking system, which in the long run can boost the industry's long-term growth.
