Every day, animal cruelty cases make headlines worldwide, whether it is the person who kills the family dog, the hoarder of sick and dying animals, or the family whose freezing, a starving dog is chained outside in the dead of winter. Animal Cruelty can also be done by Simple Negligence, Gross Disregard, Intentional Abuse, Animal Hoarding, Organized Abuse, or Ritualistic Abuse. These incidents of maltreatment cannot be overlooked because these practices inflict immense agony on these animals and till now demonstrated to have serious repercussions ranging from the fact. Combating animal cruelty is a journey that everyone, including the government, non-governmental entities, and even cultural institutions, must embark on.

As per an analysis of data of animal cruelty incidents reported on the NIBRS and FBI websites in 2017 and 2016, the FBI categorizes animal cruelty into four categories, which are listed here:

1. simple/gross neglect
2. intentional abuse and torture
3. organized abuse/animal fighting
4. and animal sexual abuse.

In 2017, there were 3,228 reports of animal cruelty from 29 states that a significant increase over the 2016 total of 1,126. Likely, the rise in the number of animal cruelty incidents does not indicate that more animal cruelty occurred in 2017 and 2016 than in previous years, but rather that more injuries were involved.

What is Animal Cruelty

- **Animal Cruelty** does have a legal definition as well (Duel, 2000). These conflicting conceptions of animal cruelty have generated a problem since the beginning of the animal-protection movement.
- **Although tremendous progress** has been made for animals in our community, particularly in the last 50 years, the ongoing absence of a widely accepted definition of animal cruelty remains a significant impediment.

- **Every act that endangers** the well-being of animals and has not previously been addressed by-laws must be challenged and conquered on a case-by-case basis.
- **Animal Cruelty is defined by** how much an animal suffers or feels Pain during its death; the degree of suffering is unimportant to animal rights activists since the animals the right to exist free of human consumption and Cruelty.
- **Every year, 10 million animals die as a result of Cruelty.** In addition, we know that 100 million animals are exploited in exploratory studies. However, since not all abuse cases are recorded, we may reasonably estimate that more than 100 million animals are mistreated each year.
- **Animal abuse is wrong because animals can die,** have many problems, and be affected for the rest of their lives. They should not have to suffer every day. Animal abuse is cruel, should not be done, and is a heinous act of violence to commit.

Thousands of animal rights activists work to protect these creatures all around the world. Here are some of the most well-known animal rights organizations. The majority are non-profit, but others appear to be for-profit since we have linked some of them back to infinite accounting.

The illicit wildlife trade has such a large profit margin. In many places, pets and farm animals are also abused. Many nations still lack adequate judicial mechanisms to safeguard animal rights. These groups extend their wings in various ways.

If you become nervous, take deep breaths and relax. Ensure you're not displaying any fear-related emotions, such as trembling, yelling, shaking, fleeing, or sobbing.

Conventional Approach

- Animal sacrifice is regularly practiced in traditional countries; worldwide, we slaughter animals for the welfare of society or the betterment of their loved ones. There are religious occasions when animals get slaughtered and enjoyed as the festival meal.

The animal is sacrificed as food rather than for any obscure mystical purpose. Followers of an Orisha will offer them food and sacrifice animals to build and maintain a personal relationship with the spirit.

-
- Some Hindu temples in India's Assam and West Bengal states and IN Nepal sacrifice goats and chickens. Water buffalos are also offered on occasion. Sacrifices are usually made in temples that follow the Shakti school of Hinduism. This form of sacrifice is done in several Tamil Nadu village temple complexes. During the three-day Gadhimai festival, several animals are sacrificed.
- On the one hand, the primary purpose of blood sacrifice could range from offering a gift, having communion, making propitiation, cleansing, averting evils or failures, and providing nourishment for Yahweh, to providing food for man.
- A religious Practicain which an object is offered to a divinity establishes maintains, or restores a human being's proper relationship to the holy order. It is a phenomenon that has been uncovered in all regions of the world and the earliest known forms of worship.
-

How can we stop animal sacrifices?

Religious festivals should indeed be witnessed in a nonviolent and sensitive manner. One can help the poor by distributing vegan food, sending clothes or toys to orphanages, volunteering at animal shelters, or putting out clean water bowls for homeless animals in the community.

Is animal sacrifice legal in India?

We have been fighting this horrible brutality for many years, which violates the Andhra Pradesh Birds and Animals Sacrifice Act 1950, which specifies that sacrificing any animal or bird for religious worship is prohibited; section 2, 3, 4, and 5.

Why should we stop animal sacrifice?

Animal sacrifice is harmful to everyone because it legitimizes killing and desensitizes youngsters to animal brutality. Furthermore, how executioners handle, transport, and kill animals for sacrifices frequently violates animal carriage and slaughter laws, making it an illegal violation.

What religions still sacrifice animals?

Traditional African and Afro-Americans and many other countries often practice animal sacrifice for religious purposes. The United States Supre Court gave a verdicton animal slaughter, which must be prohibited. As ritualistic animal sacrifice infringed on the religious freedom of Afro-Cubans who follow a religion in which animal sacrifice is fundamental. Religious slaughter is not permitted in the United States, even though it is allowed in some European legal codes.

Conclusion:

To summarise, animal cruelty is evil since it may cause the animals to die, have various difficulties, and impact their entire lives. Why they have to go through this Cruelty every day, animal Cruelty is inhumane, should never be done, and is a heinous act of Cruelty. Animal abuse can involve a wide range. Animal testing is conducted, and animal maltreatment has been linked to domestic violence. Animal violence has been linked to

childhood experiences by specific research. Owners or shelter employees may neglect animals. Animal testing is an inadequate technique to test human medicines for their effect on a rat fetus. There can be alternatives ways for animal testing that are both safer but more accurate and less cost-effective. Animal abuse and neglect can be halted and decreased if anything is done as soon as it occurs and treated when the animal is young. In terms of shelters, I believe the best way to improve them is to get rid of them and attempt to close down the ones that are still operational.
