Details of the what the subject has been tried to learn the direct knowledge of the subject and regional students in the Agricultural Entrepreneurship Course.

Keywords: Agricultural Entrepreneurship, Indian Agricultural, Indian Economy,
Agricultural Exhibition, Dr. Panjabrao Deshmukh.

1. Introduction:

Indian farming depends on nature. Monsoon's rain is an imbalance that the income is difference, the result of the changing environment is going on. Precedence in the use of natural wealth is produced. The rainfall of the rain is getting less. Where the cloudy and where month does not fall in the rain drops. In such cases, the seedlings of crops do not panic or the wild animals in the forest, in the forest, eating out of the seeds, like boar, deer, nilgai and other wild animals. This has to reduce the seeds that are expensive for farmers, while the rainfall of the rainfall in any season, then the result is due to the loss of a few periods of the crop, due to the loss of a few periods of the crop, the production is a large decline in the production. The main reason for the growing of farmers in the country does not get the expected income. Is.

Farmers do not want to do in the papers of twenty-five reasons for suicide but some major reasons are required. Due to the huge reduced prices of the commodity and seed, pesticides, there is no economic farming affordable. The true reason to go to the agricultural loss is that due to huge growth and globalization, due to lack of globalization, the

of commodities are constantly decreasing.

Due to getting a low price of the commodity, the budget of the farmers is being created, the deficit. Agricultural business has created a need to make an agricultural business in order to afford the farmers in such a situation, because the farming is low, due to lack of affordable, due to lack of affordable, and there is no other option for farmers. In the changing environment and the government's empowerment, liberalization, privatization policy is decreased. By changing the form of farming in the changing conditions, farmers, farmers need to make a little change in the device of income. If this change is accepted by becoming agricultural entrepreneurs and it is necessary to learn the process of production, marketing etc.. From this, the agricultural industry can be beneficial and many farmers have made his agricultural benefit by implementing the entrepreneurship policy in the field. And it has created its own financial prosperity by taking millions of rupees from it. By creating such agricultural entrepreneurship, many farmers have shown the way of progress in agriculture, using new technology in agriculture, studying new technology in agriculture, studying the marketing technique, studying the marketing technique, without a traditional way, without a traditional manner, increasing a large number of farmers The picture appears to be. This shows that farmers are very helping to prevent suicide. This means that the solution of independent India is independent of India's first agriculture ministers Dr.Pranjabrao Deshmukh has studied the progress in Maharashtra, Japan, America and Europe and the agriculture of the agricultural sector in the agricultural sector, but the farmers will not be able to commit suicide, but the farmers will not be able to commit suicide. Not only thought that progress is not financially progress, but in that case, the agricultural exhibitions of technology and technology and farming in agriculture and establishing new research and agricultural universities, through the agricultural conference council. He has shown the new experiment from the exhibition and training of the new experiment and in true sense. On the basis of their thoughts and actions, there has been a need for agricultural training.

2. What is an entrepreneur?:

Adam Hayes is a financial writer, write in article guide to mergers and acquisitions in February 2021 “an entrepreneur is an individual who creates a new business, bearing most of the risks and enjoying most of the rewards. The process of setting up a business is known as entrepreneurship. The entrepreneur is commonly seen as an innovator, a source of new ideas, goods, services, and business/or procedures.

Entrepreneurs play a key role in any economy, using the skills and initiative necessary to anticipate needs and bringing good new ideas to market. Entrepreneurship that proves to be successful in taking on the risks of creating a [startup](#) is rewarded with profits, fame, and continued growth opportunities. Entrepreneurship that fails results in losses and less prevalence in the markets for those involved.”

KEY TAKEAWAYS

- A person who undertakes the risk of starting a new business venture is called an entrepreneur.
- An entrepreneur creates a firm to realize their idea, known as entrepreneurship, which aggregates capital and labor in order to produce goods or services for profit.

- Entrepreneurship is highly risky but also can be highly rewarding, as it serves to generate economic wealth, growth, and innovation.
- Ensuring funding is key for entrepreneurs: Financing resources include loans and Government's scheme.
- The way entrepreneurs file and pay taxes will depend on how the business is set up in terms of structure.

3. Need of Agricultural Entrepreneurship:

The picture of 'inferior job, medium business and superior farming' were found fifty years ago in the Indian economy. Since the cost of the expense in agriculture is very low, the seeds of seeds is being prepared and the number of housing humans was not spent. The farming was a affordable because of being crowned by men and oats. Due to a large amount of expenditure in agriculture, farming has not been affordable because there is no increase in farming. Since the number depending on agriculture is large Because more than 55 percent public is based on farming. The country's economic development will also be seen only if per capita income increases. It requires entrepreneurship development program for providing information about new experiments for prosperity for prosperity for prosperity, giving gifts to the field, to visit agricultural business and consulting the expert guide, to acquire technology. These programs are being grown in a large level. But as the government's initiative, farmers often see that the text is rotating to such programs. Children who are implemented in agriculture is informed of the young people, certainly seems a picture that certainly will be filled in the development of agriculture. In order to identify the same needs, the young children of the agricultural and agricultural industries, and to provide guidance of agricultural industries and providing guidance of expert guidelines and to provide guidance of expert guidance and provide guidance of expert guidance. Was elected. Based on this, young students have been trying to create a favorite of agriculture and agricultural technology by giving students to the agricultural industry information.

4. Objectives of Agricultural Entrepreneurship Programme:

Entrepreneurship Development Program In the Objectives of this program, by awakening the entrepreneur Help, guidance, assistance, to assist:

1. Search for the rise farmers developed in the agricultural sector.
2. Knowing that the agricultural entrepreneurs can get the award to local farmers in it.
3. To succeed in curious farmers, strengthen their entrepreneurs / inspiration.
4. Process and process of establishment of small / medium agricultural industries / business to understand.
5. Getting Management Skills to Manage Unit.
6. By creating entrepreneurship in agriculture, the first agricultural minister of agriculture and social development Dr. Panjabrao Deshmukh and try to fulfill the dream of Dr. Pandharinath Patil.
7. Agriculture-enterprising is for social development by the agricultural entrepreneur.

This Shri Shivaji Education Society Amravati's exalt goal.

5. Works of Dr. Panjabrao Deshmukh and agricultural entrepreneurship:

Independent India's first Agriculture Minister Dr. Panjabrao Deshmukh, in India, making India self-sufficient in food and cultivation of progress in agriculture sector for economic development.

In the field of agricultural sector, land improvements, canal bunds. Due to the formation of large dams, the construction of irrigation, seed fertilizers and pesticides formed the factories of seeds, established agricultural colleges and universities across the country, formed the updated laboratory for research. The market was produced by the agricultural income market committee to get the right quote for the farmers.

To create farmers entrepreneur, use modern technology in agriculture, and organizing agricultural exhibitions of innovative technologies, machines, livestock, etc., by making the major experiments and farmers of the farmers and farmers. Today, the farming of their country and state level work has been developed. The country is self-sufficient, fruits, vegetables, milk production is increasingly exported. Heavenly Dr. Panjabrao Deshmukh is the work of heaven. As a part of their work, and in the farmers, this training program has been prepared for the establishment of local level agricultural industries, in order to establish a local level agricultural industry and to provide benefits of progress farmers.

Under the guidance of former agricultural and tourism minister and Shri Shivaji Education Institute Amravati's President Adv. Harshwardhan Deshmukh, and our College Principal Dr. Omraj Deshmukh this training program was completed also Dr. Vanita Pochhi in the guidance of and under the internal quality assessment center.

6. Scope:

Agricultural Entrepreneurship Training Certificate Course The course has been tried to take the course of Sant Gadge Baba Amravati University in accordance with Amravati. In this, only the students of the college were given admission, but while choosing the expert church, the advanced farmers of the local Chikhi taluka in the local Chikhli taluka, with the advanced farmers of Akola, Nagpur, Nashik, Ahmednagar, Washim, Jalna, Pune etc. have been made available to students. Although there is a brief college, the selection of experts churches have been selected from their work in various places in Maharashtra.

7. Syllabus and programme agricultural entrepreneurship:

Economics of agriculture, soil and development of development, and the study of the classroom is going out of the room, trying to raise students on the building, has been made from this training program. By actually using virtual methods, students were given information about various agricultural industries. Due to the area, the students have reached in the garden, not only on the farm, but in agricultural industries. Not only the book knowledge, but also the knowledge of how to do the practitioner and how to work directly is also efforts to show audio, video view errors and actual. Measurement agriculture, herb, herbage plantation, herb plantation, hood bag management, produce engineering agriculture heavens. The information provided by the experimental farmers, including Nursery management, marketing, marketing technique, market, etc., with milk production, goat-sheep, poultry, organic ministry, etc.

The Maharashtra Government Agriculture Department and Dr. Panjabrao Deshmukh Agricultural University Akola and Maharashtra Animal and Fisheries, University of Nagpur and Maharashtra Animal and Fishery Conservation Science, students were given information about various experts. In these courses, the actual farmers, entrepreneurs, government officials, the officials of the Government, Agriculture, Researcher, Professor, Governor Agricultural, National level agriculture, and professors of agricultural economics, were

given to the guidance of 30 expert guidance of the level of agricultural education His supplementary pair of business experts, entrepreneurs, farmers were guided by training program programs. In addition, students were given knowledge on the basis of the actual demonstration of the area, survey, industry training, agriculture, nursery training, market status.

After each training, according to the students of the students and the doubts were satisfied, after the expiry of the training, after the training ended, the students of the students were known to the first use of the new experiments in the field. Many students understand from this training program, along with the help of farming from milk business. In this training, the guidance of Vidarbha and Maharashtra in the district will help the farming industry but the students expressed their opinion that optimism for the future. Agriculture Science Center expressed his pleasure to get a lot of information from *Shivar feree* (farm round), Buldana. Dr. Punjabrao Deshmukh Agricultural University Akola's Registrar, Dr. Surendra Kalbande The students received information about various schemes of the government due to and Taluka Agricultural Engineering Officer of Taluka Agriculture Officer and Taluka Agriculture Engineering Officer. Only not only information, but due to actual knowledge to take advantage of government schemes, the students of this knowledge showed the student of thinking about how the farmers of their village will benefit from their village. In a brief, there is no initiative in agricultural entrepreneurship training program, which has been working to bring financial speed in agriculture.

8. Conclusion:

It may be the first attempt to give the first effort to provide agricultural-industry knowledge while not having an agricultural subject in the Agriculture University and the curriculum. registrar, Dr. Punjabrao Deshmukh Agricultural University of Agricultural University, said in his inaugural speech. If the agricultural income has increased, then the country will increase the GDP and the implementation of the entrepreneurship training program, after completing the goals of the training program, after completing the training program, has been found in the feedback given by the students. Local entrepreneur and experimental farmers have learned from this training program. In fact, it is possible to get the information about the new experiments and new technology information in our neighborhood. While establishing Shri Shivaji Education, farmers are intended for education to the farmers to teach. Apart from this, not only training but also in the subjects like agriculture, to create an agricultural exhibition to create an agricultural exhibition to create an agricultural exhibition to create a agricultural exhibition, and in order to develop an agricultural exhibition, such training programs in order to develop a Dr. Punjabrao Deshmukh. The Picture of the farming entrepreneurs in the taluka of this training program is certainly becoming a positive result.
