Abstract

Empowering women means promoting women's sense of self-worth. This means promoting and helping them decide their ability to identify their weaknesses and overcome them. Empowering women leads them to take a step for themselves in society. Woman Empowerment is used to give the power of equal opportunity in all fields to women irrespective of all caste, creeds, and colors. Women empowerment is considered to make them powerful so that they can decide what is right and wrong for them. Earlier, men in society were considered to be supreme. All decisions were taken by the man and he would be the sole bread owner for the family. Women were considered to be responsible for upbringing the children and looking after the household work. Women were not allowed to work or even study after a certain age. They would be married at a tender age and then have to look after the family of their husband. Work used to be divided according to gender and not for skills.

Women empowerment means giving the power of taking crucial decisions to women. It means empowering women by letting them study, work, and wear whatever they want without letting any restrictions on them. To make them empowered the one thing we as a society can do is to educate them. No matter where the woman is born, either in rural or urban areas, they should be given basic education and then the liberty to choose her life

decisions. Women can only be empowered with the help of education as it will teach them to differentiate between what is right and what isn't. Women empowerment is not only necessary for oneself, but also for the society. Empowered women can only teach the others about what difference a slight change in attitude can bring to the society. Women's education not only empowers her but a family too. Nowadays in most IT companies and leading business firms we can often find the top most positions occupied by women. They inspire the underprivileged ones to try hard and become a successful person in life.

In true path political and economical development has never been understood and estimated by the male people that it will ruin and devastate male people's true leadership responsibility in ruling family and controlling the family system. After women get self sufficiency and strong hold in political, education, economical and social they would like to dominate male people's rights and also pose threat to their life and survival with an interest to win in this battle against male people's god govern rights. wherever and everywhere from capital to global women's vice are echoed and reflected against male people's right and wrong attitudes with an interest to defamation and contaminate male people's image and social status. Owing to women empowerment god govern natural responsibility, role and attractions and duties are divided, disrupted and destroy with an interest to survive female people alone without male people's role and presence. India is famous and prominence in its rich history, culture, education and orthodox which is encountered, threatened and disturbed by the modern day women's social, economical and political equality because these are the basic needs of the women which they should use in constructive ways but used or using in culprit and conspiracy ways regarding to charging fake allegation and complaining over male people that they behaved arrogantly and rudely with women working places and family. from family to politics there are large scale women's domination and fake allegations over male people's dignity and self respects thereby they are not able to run family and nurture children and also able to protect family dignity. In this critical and pathetic situations male people are thinking female are superior to male people against god creation and settings. In most of families women are not respected and treating male people fairly according to the god given rights and creation that male or female must be pillars of the family should rune family with joint opinion and trust without bias and superiority complex. Moreover, male and female people are thinking that who must be leader and superior in the country and family in determining all issues and problems of the nations and family? .Because items of managing family, spending money, exercising social, political and economical rights problem has been arsing between

male and female people in all social places and dimension owing to women empowerment. Properly and neatly legal mechanism and judiciary must explore and examine basic inclination, rights and powers of the male and female peoples toward managing and tackling all social, political and economical activities from family to politics with an interest to save India's beautiful rich cultures, habits, customs and orthodox. fore women empowerment was introduced women were living beautifully and fairly along with male 's people support from politics to family after women empowerment was introduced women has started to attack, annihilate and destroy male people rights with an aim to survive female people alone. In this angle women empowerment has let them to beget children without male people's support and rule family. Because of the science and technology influences women's rights are wrongly directed against male people's rights and dignity with an interest to test whose power is majestic and superlative .In this females game and politics family system is collapsed without a strong image in the social system. Once upon time male people were addicted, revered and venerated female people on account of their effective and better social responsibility and vibrant commitment in the family system which has been slowly disappearing and seedily ruing the entire social integrity and family dignity due to impact of the women empowerment. Most of women have been understood that women empowerment is to suppress male people and preventing male people's rights and liberty instead of understanding it is tools and weapons to develop their career and achieve social, economical and political benefits. In family system male superior and strong people to protect their defendant for family development and success without any hindrances, which are mistaken by the female people after 75 years threat male people are no longer should be superior and leader to female in all walk of social, political and economical dimensions. Social system is widened and broadened one in which female's rights, dignity and respects must be protected since there are lot of miscreants and anti-social elements in the social system, in this aspects male people has been created as a strong as a family leader by the god both in physiologically and psychologically to protect female's life and rights without any harms from the rascal people's bad behaviours. If both are even without any distinction on physical and psychological aspects nothing different and success could take place in this social system. Always one must be superior and other must be inferior inferior's rights must be protected and saved by both superior and law without any bias .Inferior and superior is meant to rule the nation and family in a positive ways except this connotation nothing extra point could be understood and feel. One of the stunning and malicious thing is female people from education institution and social places have been creating and rising false rumours ,fake allegation on male people

once they don't like anybody else .Female frankly able to charge fake allegation on male people with the courage and motivation of women empowerment thereby social system, economic system and political system are highly perplexed and damaged .most of crime is happening owing to female people misusing their natural powers toward contaminate and defile the male people's rights.

Summary

Based on above narration and discussion male are superior, leader and administrator in all institution according to natural creations with an aim to protect and preserve female's rights and liberty. At any cost this quotation and philosophy should not be mistaken and misunderstood by the female section as to revenge male people's life in all the social and political institutions. Male has born while female born to give hands to lift them from down to upper world for achieve their success in political ,social and economical ,without male people's support female people is not able to achieve their dreams and success in all types of needs and necessities. Male are pillar and vertebrates of the family development as well as safety dimensions without their role female would be seen binary. As to revenging male people's victory and success by using female people's natural sentiments and identity should be stopped in all walk of life .Unless they like any male people in all places they use their naturally given identity against male people's life ,this was understood by all that women are using their physiological identity wantonly toward revenging male people's rights .This society would be protected and straightened from bend of shyness when female people try to give respects to male people without any bias and egoism .Without bias ,partiality, segregation, both genders are joining together to constitute and construct congenial atmosphere in family system. Encountering, endangering, engulfing, envying, making enmity, jealousy and other fake allegation charging on male people should lead to create gap and lacuna between male and female with hatred tendency so, women have to use their life ,rights and empowerment straightforward without any hidden agenda and vengeance feelings over male people in all the social institutions.
