Key Words: Education, Magic, Mythology, Fiction, Imaginary

Theories of Education

In a world where technology has become the backbone of education, it's easy to forget the magic of learning. But magic can enhance your understanding and make learning an unforgettable experience.

J.K. Rowling is the mastermind behind the Harry Potter universe. Her imagination and writing skills have brought to life a world of magic, populated by characters we all love and identify with. J.K. Rowling's writing about a fictional high school for the magically gifted has quietly reinvented high education in the United States. Harry Potter "the boy who lived" has become the boy who has captured the hearts and imaginations of millions of readers. In the process J.K. Rowling has conjured new tools to understand and structure students. How Harry Potter can help one understand a student's educational experience. Harry Potter readers allow for complex thought on experiences to be summarized through a series of identification with characters, places, and ideas in the books.

Legends in wizarding worlds

In Harry Potter novel many hidden myths and legends are packed into the wizarding world. Some of the legends behind Harry Potter are well known. Rowling also pulls from Greek Plato and Romans like Ovid, Rowling combines timeless sources with attention to a new generation, creating a new myth for the modern era and capturing the heart and mind of millions.

Education and knowledge in Recent Children's Fantasy

This paper is an investigation into how learning is portrayed in children's books. It starts from two premises: First that at least one origin of children's literature is in didacticism and that learning, and pedagogy continue to be important in much of the literature. We provide for children today. A reader's history similarity traces the origins of children's literature in didacticism, as does Potter hunt in his very different Introduction to children's literature. I am presupposing that the business of the child's life is education - which in our culture most often means school.

The Teaching & Education Style

J.K. Rowling has offered the magic method of the Education in the series of Harry Potter. She suggests the mixture of educational principal from the world of Muggles (People) and Non-Muggles (wizards). J.K. Rowling presenting all future technologies in education in different genres. The ideas of literature can be used to provide the originality and the uniqueness of methods, adding some special ideas into the traditional methods can increase the motivation for

studying of generation. Such integration can lead to a successful migration in the widespread sphere of professional activity and to an adequate reaction to all changes and shifts.

The Subjects Taught at Hogwarts: Transfiguration, Charms, Potions, History of Magic, and More. The classes are taught by expert witches and wizards, each with their own unique style of teaching. Language arts education is field where magic can enhance the learning experience. By using storytelling and other techniques, teachers can use magic to make language arts more immersive and engaging.

Howard - A magical school

Education is critical to the world of Harry Potter. The characters learn how to harness their magical abilities, make friends, and fight against the dark forces that threaten the safety of the wizarding world.

“New and Refreshing Approach Rowling’s imagination has inspired us to search for clues to her theory of education and it will hopefully inspire others to find new and refreshing approaches to students learning. We have found five theoreticalpillars easily applicable to the world outside of books. The book’s global effect would probably not be possible without their firm foundation in Hogwarts, aplace that practices trans formative education that engages physiological, emotional cognitive and development dimension of its students and by extension, the readers.

Conclusion

Magic can be a valuable tool for educators, creating an immersive and engaging learning experience that captures students' attention and imagination. J.K Rowling has offered magic methods of education in the series of Harry Potter. She suggests the mixture of education principle from the world of Muggles (People) and Non-Muggles (Wizards). The main part of this is the subject of teaching and objects of the teaching. The object of teaching consists of school subjects, classrooms, school equipment. By using magic to illustrate complex concepts, bring history to life, and make learning fun and exciting, educators can make a lasting impact on their students' education.
