Abstract :-

This paper examines the impact on women's in our society in the form of cruel murder happening in our country.

The research will be recorded or traced by the ground reporting. We will also take the help of the internet to search the findings for our research work. Those research work will be covered under 15 days. There will be certain journals to be covered for our research work. We will also take the help of browsers (i.e. Google, etc.)

Nowadays, we hear about the murder cases, allegations, frauds on the women's. The murder cases are increasing day by day in our surroundings. So, it isn't safe to any women to be independent. It affects families of victims also and the families of defendants also. This study is incorporated with the moral obligation to protect life of a women, not to take it.

The victim of the case should be given a death penalty for cruel behaviour done by him (IPC 302). He should be penalised by the law or give him a imprisonment till death. It takes longer to announce the death sentence, during which the prisoners experience both physical and mental suffering; as a result, the convicts begin begging for the death penalty.

Introduction :-

In India, we have the population of almost 139 crores people. While, we divide the population of our country we came to know that we have 52% of male population & 48% of females population (i.e. 66 crores). According to the census report 2022, We have 943 females per 1000 males. Also, our country is diverse with several cultures & religion. So, each culture has different aspects according to their religion. So it's very important to safeguard our women & girls of our society because our family members are also included in it (i.e. our mother, sister, relatives, etc.). It's our responsibility to protect the women & safeguard them from the evil eye of the peoples of our country. So, in our research paper we will discuss about the same topic which will be in detail that how to protect our women & girls of our society. We will also discuss about the some of the measures taken for it. We the students of BAF department are presenting the research paper on the very much

tricky and in today's era most controversial topic which we needed in nowadays that is "Protection and Safety for women in our society". The main title of the research paper is "death penalty as a cruel murder."

Keywords :-

Allegations, Murder, Capital punishment, Liberty, Imprisonment, Impoverished, Obligatio**n**.

Objectives :-

- (i) The objective of creating this research paper is that to aware the people of our surroundings and our country about the status of women in our society.
- (ii) To take the necessary measures & steps for the safety & protection of our women & girls in our society.
- (iii) To force the act to give the accurate punishment to the assailant. (I.e. attacker).

Findings :-

Nowdays, we hear about the issues faced by our women & girls in our society. In our beloved country india, we hear lots of murder cases of women's happening nowadays. The girls are killed by their partners for the small & inappropriate reasons. In india, we record 82 murder cases per day. Overall, Delhi has registered highest number of murder cases and Nagaland has registered the lowest number of murder cases in our country. We hear the most shocking & terrifying case of delhi which got highlighted after the 6 months of the murder of the victim & assailant kept the chopped parts of the body in the fridge.

We carried out the survey through google form from the people around our surroundings & area to know what the people think or aware about the safety & protection of the women's & girls. We also took the help of the browsers & google to collect the information of the various cases happening nowadays in our country. We talked with the people around us & we came to know about the conclusion that most of the people are aware about the safety measures taken by our government. We also took the help of the sources which helped us a lot in the research work.

Research methodology :-

When I was carrying out my survey so I noticed that some of the people's were not aware about the safety measures taken by our higher authorities (i.e. government, law enforcement officers,etc.) for protecting the women's of our society. I am sharing my experience which I got while carrying out the survey.

One day, while I was walking through the road I heard the shocking & terrifying murder case which was happened in the city. Early in the morning, Mr. 'x' was the husband going to the work place at 9:00 am from his house. While leaving, he forgot something to carry car keys to the office so he came back inside the house & asked his wife mrs.'x' to give her that car keys. So, she started to prate & mr.'x' heard it. So, he started to argue with her and later on this argument turned into a fight. After a while, mr.'x' picked up the glass in the anger and accidentally attacked on his wife. Mrs.'x' got hitted in the head harshly & she fell down & she called off dead. So after seeing the dead body of his wife mrs.'x', he gets shocked & hesitated because that was done accidentally not impulsively. After few minutes, he decides to hide the incident that was happened accidentally by him. At that late darknight, he takes the dead body of his wife to the dark forest & push down from the peak of it and he returns back home after 3-4 hours. After 15 days from that day, the police finds the unidentified dead body of the women in that forest. So, they circulate the photos & tries to identify that women. After 5 days of effort taken by police, they gets the identification of the women which was recognized by her neighbours. They also told the police that her husband was ran away from that place suddenly & he was frightened about something. After 20 days, they found mr.'x' in another part of the city & caught him & was brought to the

police station. After interrogating him, he commits that the murder of his wife mrs.'x' was accidentally done by him & because of the fear he tried to hide this incident done by him. Thereafter, he was penalized by the IPC SEC 302 (punishment for the murder) & IPC SEC 201 (causing disappearance of the evidence or the offence). He got punishment of lifetime imprisonment. After IPC SEC 302, this act is non-bailable & non-compoundable.

Safety measures for women's in our society :-

We should take some of the necessary steps & precautions for the protection & safeguard the women's of our society. The government of our country already launched lots of schemes & forces for the protection of the women's. We will discuss some of the important schemes that were launched for the protection of the women's of our society :-

1. Ujjawala :- A comprehensive scheme for Prevention of trafficking and Rescue, Rehabilitation and Re-integration of Victims of Trafficking and Commercial Sexual Exploitation.
2. Nirbhaya fund :- These funds are used to improve the women's safety & security projects.
3. Shakti app :- The state of himachal pradesh has launched the "shakti app" for women's safety that allows women's to send a distress call to the police.

These are the some of the schemes that are launched by the various government's to protect the women's & girls in our society.

According to me, these should be the steps or measures taken by the people to safeguard our women of our society.

1. We should give parenting to our sons to how to respect the women's & girls in our society.
2. We should teach each & every girl in our country to self-defence themselves from the evil eye people of our society.
3. We should support our women's to come in front & speak out themselves in front of the peoples.
4. We should also develop some of the more apps like "Shakti" to help the women's & girls in the disguise.
5. We should make schools to implment the value of the girls in the society by taking sessions for it.
6. Night patrolling should be done, safe traveling services for women especially during night, helpline numbers with immediate responses should be bought.
7. Promoting and protecting women's rights at national level.
8. Women's should learn all the safety measures...All men's should know how to have the conversation with girls...
9. We should strict more laws & acts so that the assailant (attacker) would be frightened to create an crime.
10. We should provide more funds through the local authorities & government's to support the projects conducted for safety & protection of the women's of our society.

These are the steps or precautions that we can take to safeguard & protect the women's & girls of our society. These can help us to make our surroundings & country to secure for women & girls in our society.

We know that our government of india has IPC (Indian penal code) acts to justify the crimes as per the case or incident. If there is a case of robbery or fraud it is considered under the IPC act (392). They gets penalized by the (sec 392) i.e.(punishment of robbery) which means whoever commits robbery shall be punished with rigorous imprisonment for a term which may extend to ten years, and shall also be liable to fine. If there is a case of violence or the murder it is considered under the IPC act (302) i.e. (punishment for murder) whoever commits murder shall be punished with death or (imprisonment for life), and shall also be liable to fine. In this,

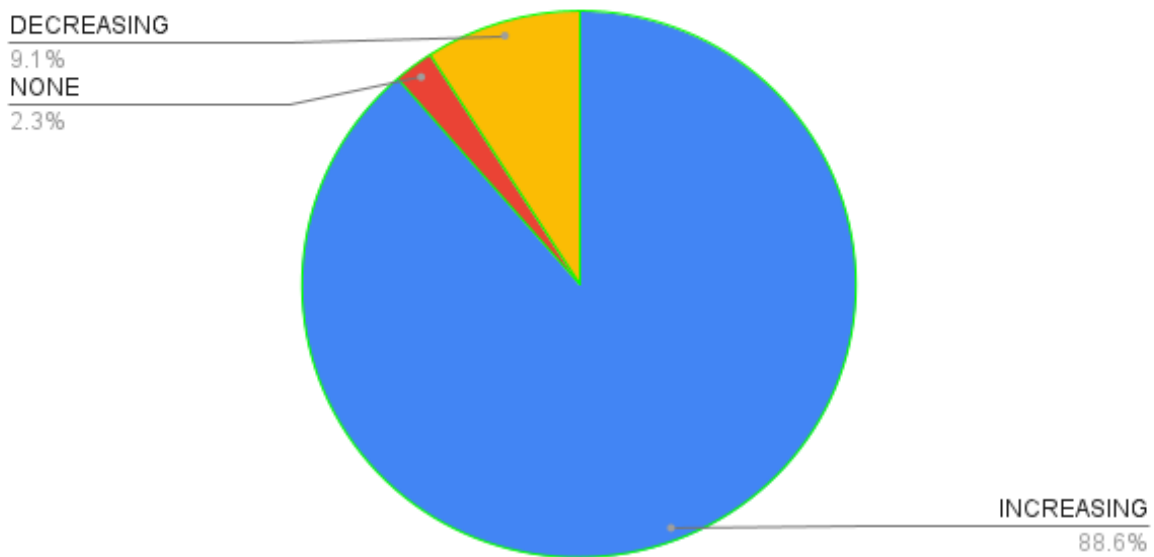

we came to know that according to the government & ipc sec, as the case or incident is intense that the charges that will get penalized or punishment will be more stern.

Data interpretation :-

Here are some of the questions that were asked for the survey to know that how much people are aware about the safety measures & the IPC sections of our country.

Question 1 :-

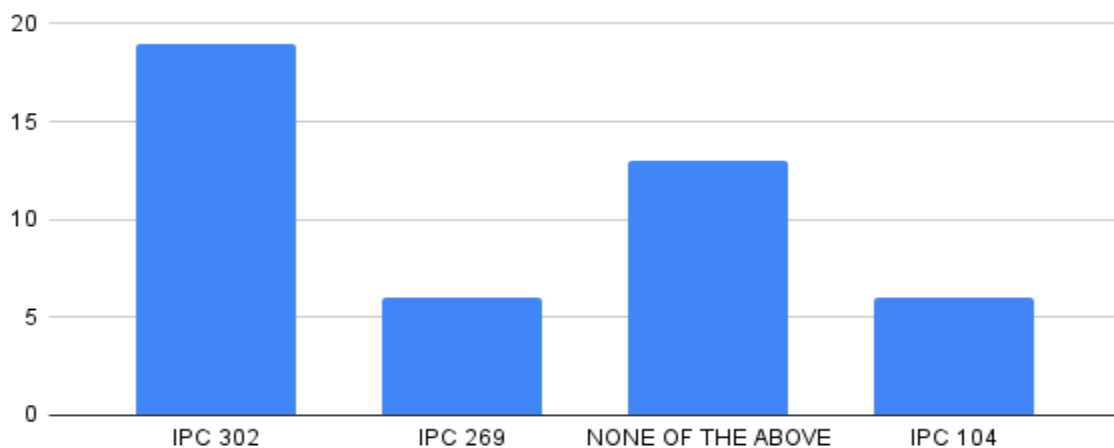

Count of 1. WHAT DO YOU FEEL CRIME'S AGAINST WOMEN ARE

In this case, the most of the people thinks that crime are increasing day- by-day in our country.

Question 2 :-

Count of 4. WHICH ACT PENALIZES THE CHARGE OF DEATH PENALTY?

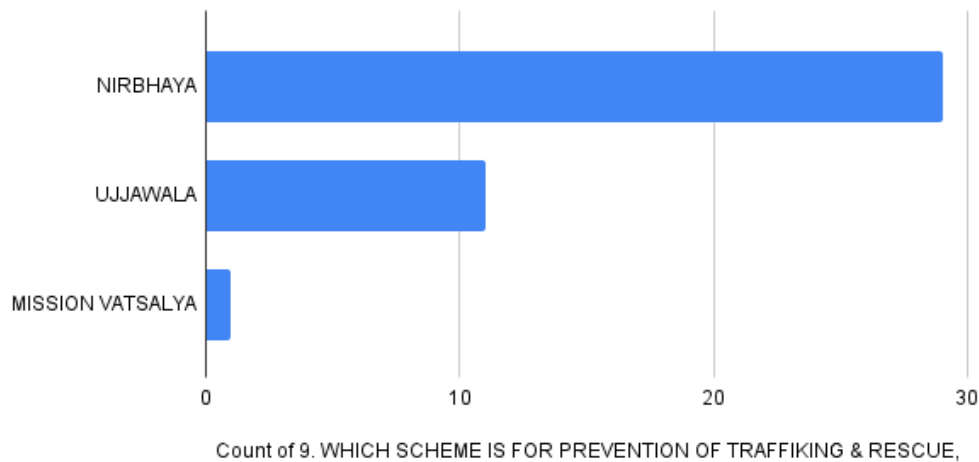

Count of 4. WHICH ACT PENALIZES THE CHARGE OF DEATH PENALTY?

In this case, the most of the people of our society are aware about the charges penalizes for the death.

Question 3 :-

Count of 9. WHICH SCHEME IS FOR PREVENTION OF TRAFFIKING & RESCUE, REHABILITATION & RE-

In this case, we come to know that the people of our society are not so aware about the schemes because the ujjawala scheme is a correct option. The nirbhaya fund scheme is to support the projects supporting the safety & protection of women's of our society.

Review of literature :-

I referred the journal & took the help of the google, browsers, etc. Also, I took the thoughts of the people through google form. I also created the story for the example to understand the topic easily.

- (i) Google;
- (ii) Journal of india today;
- (iii) The link for the refrence of the survey.

Conclusion :-

We should know how to respect the each & every women of our society. We should always support our women or girl to live their life independently that we will reduce the evil eyes of our surroundings, society, country & the whole world.
