

Predicting Earthquakes Astrologically

Mr. Nune Venkataiah

Assistant Professor, Department of Jyotishya-Vasthu, School of Social and other Sciences,
Nampally, Hyderabad.

Sarvato Bhadra Chakra (SBC) is like a light lamp empowered to enlighten the whole world. The term Sarvatobhadra means overall auspiciousness (sarva-overall: bhadra-auspiciousness).

Sarvatobhadra Chakra is a tool (chart) in which predictions is based not just on transit of planets in 12 signs, but it takes the 12 signs, 28 nakshatras, the 30 tithis, the 7 weekdays and the 50 aksharas (Sanskrit Alphabets) and even DIRECTION'S are taken into consideration, almost all factors of vedic astrology.

This one chakra alone; can be used for variety of analysis of planetary transits. Although the prime focus here is analysis of transits, this can also be used for natal horoscope, dasa analysis, Fixing of Muhurthas and Mundane events, etc.,

VEDHA means ASPECT. But here we don't use word ASPECT because aspects for all planets are same on this chakra (1) diagonal clockwise aspect, (2) diagonal anti clockwise aspect (3) across aspect.....

These three types of ASPECTS are called VEDHA'S on this chakra.

While in normal transits of planets, vedha of other planets can nullify the benefic or malefic influences, in Sarvatobhadra Chakra, the Vedha shows the influence of transiting (or natal) planets on various nakshatras, signs, tithis, akshatras etc. The vedha of benefics are considered to be favorable and that of malefic are considered as unfavorable. The influence is stronger if they are exalted and retrograde while weaker if they are debilitated.

Effect of various planets on the said nakshatras will give specific results related to the nature of planets under consideration. While influences of benefics enhance good fortune, influences of malefics cause suffering and destruction. In his context the benefics are Jupiter, Venus, well associated Mercury and strong Moon and malefic arte Saturn, Rahu, Marws and Ketu and the Sun. Association of Mercury with Saturn and Rahu makes it extremely diabolical while association of Sun and Mars makes it only mildly malefic. Similarly dark Moon from Krishna Chaturdasi to Shukla Pratipada is quite malefic while from Shukla Dvitiya to Shukla Ashtami and Krishna Ashtami to Krishna Trayodashi is mildly malefic.

If malefic plantes get exalted or retrograde, and then it becomes extremely malefic. Thus it is de rable to have benefics are retrograde or exalted and malefic ad debilitated.

Locating Events in Mundane

Sarvobhadra Chakra can be successfully applied for prediction of the location of the mundane event.

Strength of the Mundane Events

After deciding the direction the “Vedha” Right “or” left, and Vedha” given benefic/malefic nature of planets.

Moon, Mercury, Venus & Jupiter are considered “BENEFIC”

Mars, Sun, Saturn, Rahu, & Ketu are declared “MALEFIC”

The Intensity of the event depends on how many malefic “Vedha” and how many Benefic “Vedha” are happening to a particular sign.

By this SBC offers more detail and the strength of the event which going to happen, good (or) bad.

Location of the Mundane Event

Location can be determined by “Vedha” formed on a specific sign Direction of that location can be found by the star and alphabet which it is corresponding ot.

Vedha on Aries: Prosperity and health or the reverse, inhabitants as a whole; its general condition of action and movement. Life science, money matters, violence, all undesirable traits, fireplaces and tool house.

Calcutta, Alexandria, Chicago.

Sarvato Bhadra Chakra is an instrument, involving Constellations, signs, Tithis, Vara, Aksharas, which is useful in natal, horary, muhurtha and mundane matters. It is also useful for Business forecasts such as Rise and Fall of prices of commodities, weather forecasts which are useful for national economy. It is not so widely used as it should have been used and astrologers should exhaustively use this Chakra considering its utility.
