## Abstract

Any nation, to grow today in the world of intense competition, requires entrepreneurs at the core of the economic development. Entrepreneurial activities and entrepreneurship have been dominated by males since ages. However, in the era of information technology, the women have become more aware and better educational facilities have enabled them to venture into this male dominated space. The women today have emerged as a key player in economic development of the nations. However, this transformation of society is far from over and the women entrepreneurs not only face difficulties while starting up an enterprise but also during the running phase. Globally, they have become a key player in sustaining both social development and economic growth. However, in a country like India where almost 50% of population is made up of women, the number of enterprises run by women entrepreneurs is only 7.36% or out of 361.76 Lakh enterprises in the MSME sector, only 26.61 Lakh have women at the top. There are a number of socio-economic hurdles faced by the women while they attempt to venture into setting up and running their own enterprises. Hence, the paper discusses the status of the Women Entrepreneurs especially in Shimogga district and their importance.

*Keywords: Women Entrepreneurship, Women Entrepreneurs, Challenges, MSME, Finance.*

## Introduction

An entrepreneur is a person who is involved in economic activity and takes an initiative to start a business with innovative ideas. Entrepreneurship provides huge opportunities for self - expansion as well as serves the society. All over the world, entrepreneurs provide vast employment opportunities by setting up Micro, Small and Medium enterprises in urban, semi - urban and rural areas for uplifting the living standard of people. The phenomenon of women entering the entrepreneurial arena is in the early stage as businesses have been male dominated and women have always engaged in homely affairs i.e cooking and nurture the family and children. Over the last few years, the scenario has changed and the women have come to the forefront as not only memorable but also as inspirational entrepreneurs. Entrepreneurship as such is not bound by the class, religion, community, gender or age and hence any person can start a business today.

- 1 In past few years, women entrepreneurs have been involved significantly in the development and social progress of the country due to industrialization, urbanization along with education and awareness. This opens up ample opportunities for the nation, society and the family. Setting up their own ventures not

only makes them self-sufficient and self-dependent but also enables them to create their own social identity. This way they have been able to achieve work-life balance and contributed to the satisfaction of their customers by involving themselves in the innovation of the products

- 2 Also they have been able to empower people economically. Various sources of data confirm the contribution of this new generation of entrepreneurs i.e. the women entrepreneurs play a crucial role in the economies across the world.
- 3 In U.S., 1.5 trillion dollars worth of sales is generated by more than 9 million firms owned by the women entrepreneurs<sup>4</sup>, whereas women own more than 26.6 lakh MSME units in India. Women have entered into the manufacturing, service and trading sector and thus their role has gone beyond some selected professions. Clearly, in the economic development of the nation, the role of a women entrepreneur has become significant.

This has resulted into more focus in creating a healthy environment for establishing and smooth running of women led MSMEs by the government of India. There have been several steps taken in this direction by the government in the recent past and as a result, the number of enterprises, owned by women, has been steadily increasing. Nearly 10% of the MSMEs in India are owned by women entrepreneurs<sup>5</sup>. Special incentives and subsidies have been provided to the women - owned MSMEs by the government of India, yet there is a huge gap existing between the male and female entrepreneurs is to be covered. Obstacles are faced at every stage of setting up business by this group of entrepreneurs. Hence, the purpose of this paper is to discuss the need of women entrepreneurs, identify the challenges faced by these women entrepreneurs by reviewing various literatures and provide some suggestion for overcoming these obstacles.

### **Objective:**

This paper seeks

1. To study status of women entrepreneurs in Shimogga district in comparison to entire India.
2. To suggest ways to improve women entrepreneurship.

### **Status Of The Women Entrepreneurs In India**

Women Entrepreneurs may be defined as a group of women who initiate, organize and operate a business or enterprise. The Government of India has defined women owned enterprises as — “an enterprise owned and controlled by women having a minimum financial interest of 51 percent of the capital and giving at least 51 per cent of the employment generated in the enterprise to women”<sup>6,7</sup>. In the early 90s, the entrepreneurial activity was dominated by men and the involvement of women was limited to household jobs and agricultural activity.<sup>8</sup> In a situation where the earning male member is no more or left, the family would be a big loser.<sup>9</sup> As per 2001 census; women constitute nearly half of India’s population of which, 72% were engaged in agriculture, 21.7% in non agricultural jobs and remaining in household industries.

However, the introduction of the policy of globalization and with the promotion of privatization during the mid - 90s, the women started venturing into this male dominated area of entrepreneurial activity.<sup>8</sup> Today, they not only guide but also head several industries. Various pull and push factors have led to the involvement of women in business activity as this not only makes them financially independent but also results into higher self - belief and confidence. The women today have started venturing to the MSME space in big ways setting up their own ventures.<sup>6</sup> On one side, factors like low income, strict working hours, need, lack of job opportunities or job satisfaction, work-life balance, etc. lead the women to take up entrepreneurial activity, whereas on the other hand better financial opportunity, desire to help others and attaining self accomplishment motivates a women to take up entrepreneurial activity.

In India, 26.61 lakh enterprises are female - owned out 361.76 lakh enterprises in the MSME sector whereas 120 lakh employees are female out of 805 lakh employees as per the MSME annual report 2014-15. As per business report 2014 and survey done by IFC, women – owned enterprises contributes 3.09% of industrial output and employ over 8 million people<sup>12</sup> However, the growth of female – owned enterprises in India is relatively lower when compared with the other developed and developing countries. As per the report of Female Entrepreneurship Index by the Global Entrepreneurship and Development Institute, in a survey of 77 countries, India ranks 70, just above Ethiopia, Iran and Ugandan which shows that in India, there is no adequate environment for women entrepreneurship development and their growth. While the number of women operating their own business is increasing globally, Indian women entrepreneurs continuously face huge obstacles in the growth path of their businesses, such as insufficient initial and working capital, strict social constraints and limited time and low skill.

### **Need Of The Women Entrepreneurship**

As per the 2011 census, Indian population comprises of 48% women. 34% of the population participates in the financial and economic activities with many of them not being paid.<sup>13</sup> In the case of an unfortunate event of losing the earning member, they are heavily dependent and the survival of the family is at stake. Hence, promoting women entrepreneurship is an important activity that any society should promote. Involvement of women has its inherent benefits for the industry as well as society. Professionally, the women entrepreneurs setting up their own firms help in create new employment opportunities and per capita income of the nation is increased. Socially, they become independent, provide a better and brighter future for the next generation as well as family, better education and awareness levels, more confident about themselves and are in a better position to manage family businesses in case of loss of the earning member.<sup>14</sup> The major reason that attracts women to begin as an entrepreneur is that they have innovative ideas and ability to do something creative which helps their individual identity to be recognized at not only local or national but at a larger also global level

**Figure 1: The Need of Women Entrepreneurship**

### Problems Faced By Women Entrepreneurs

**Lack of Education:** Searching for opportunities, ability to examine and understanding them and building a successful business around this opportunity are the essential traits of an entrepreneur and to be able to do this, education is an important factor. It has been experienced that the female population in developed countries are more educated as compared to their counterparts in developing countries.<sup>16</sup> In India, the situation is that the 56% of female population is literate with majority of them not even having education beyond school. This leads to a scenario where the women entrepreneurs are not adequately equipped to the latest developments in technology or market, let alone being aware about new business opportunities. Thus, women entrepreneurs run into a number of problems while setting up and operating their businesses due to this deficiency.

**Table 1: Literacy Rate in India**

	<b>Total</b>	<b>Male</b>	<b>Female</b>
<b>Population (In Crore)</b>	121.09	62.33	58.76
<b>Literate (In Crore)</b>	76.36	43.48	32.89
<b>Literacy %</b>	<b>63.07%</b>	<b>69.76%</b>	<b>55.97%</b>
<b>Literacy as % of Total Population</b>	-	<b>35.91%</b>	<b>27.16%</b>

Source: General Census 2011<sup>13</sup>

There is an 8.75% gap in the literacy rate at the national level. 89.57% of the literate population is educated to higher secondary or below levels. Only 9.07% of the total female literate population as against 11.47% of their male counterparts has an education of above higher secondary and hence a lot of work is required to be done to enable women population to get higher education and equip them to venture into entrepreneurship.

**Social Barrier:** Gender discrimination, fear of reaction from the society, family responsibilities and commitments are some of the factors that combine together to make a social barrier for women to venture into entrepreneurship. Women in India are treated as subordinates and live as dependents to men and thus it is assumed that entrepreneurship is not the subject of women as it is a total preserve for men.<sup>18</sup> The duties,

responsibilities and obligations towards family is considered to be acting as a barrier for women to take up entrepreneurship. Various surveys show that this attitude is a result of pressures brought by the conservative thinking of a traditional society as the women are expected to prioritise delivery on family front as against any other activity.<sup>19</sup> It is more visible and prominent in rural areas where the traditional role of women results into almost no or less time to be spared for business activities.<sup>5</sup> The women are made to feel guilty in case there is any lapse towards family duties thus indicating the lack of family support and commitment towards the development of women in society.<sup>19</sup> This also restricts a woman from setting up and running a business, visiting banks, attending entrepreneurship development training courses and seminars and conferences, attracting customers or looking for diversified suppliers.

**Financial Problem:** The Financial problem of businesses is related to shortage of adequate finance, difficulties in obtaining credit from banks, Low risk-bearing capacity, problem in capital for expansion, unaware about appropriate finance sources, lack of collateral, complex and lengthy loan procedures, etc. In India, women entrepreneurs always suffer from inadequate and inappropriate finance resources. They are unable to acquire finance from external sources such as formal financial institutions due to low creditworthiness and absence of accurate collateral as women have very less property and bank balance in their name.,<sup>18, 17</sup> Research done by Robert in non-OECD and developing economies reveals that 59 percent of the respondents have mentioned financial problem as crucial problem followed by 41% having difficulty in obtaining a loan. Sandhu, (2012) discussed in his research that bank official takes a final decision on a loan application of women entrepreneurs when female owners provide collateral and have given a letter of guarantee from blood relation or husband or a head of the village for setting up enterprises. It is normally believed that women being feminist gender have low risk taking ability.<sup>21</sup> Thus, women entrepreneurs start a business with a very low level of capitalization and low level of debt finance and do not use much of private equity for their business sustainability due to unfavourable internal and external conditions.

This financial exclusion is due to voluntary and involuntary reasons. Women entrepreneurs have voluntarily excluded from banking services due to lack of literacy as well as complex and lengthy procedures of bank loans. On the other hand, involuntary exclusion from financial services is happening as banks are not interested to provide loan facilities due to high - interest rate, low level of credit worthiness, absence of past credit history, low level of credit bearing capacity and unhealthy relationship with banks while availing bank credit.<sup>22</sup> In addition, women entrepreneurs are not aware of financial assistance i.e. subsidies, incentives, tax relief etc. provided by the financial institutions and government which result into business failure.<sup>6,24</sup> This results into women becoming more dependent on her small savings and loan from family and friends for their day to day operations which is not sufficient for business sustainability.

## Case study of Shimogga women entrepreneurs

Unit of analysis: Individual Women Entrepreneurs in Small and Medium Scale from Shimoga district of Karnataka State constituted as unit of analysis.

District	Units Headed by Women	Sample of units	Service Sector enterprises	Samples of the study	Manufacturing sector enterprises	Sample of the study
Shimoga	15	7	00	00	08	05
Bhadravathi	12	9	03	02	10	07
Sagara	12	17	01	01	23	16
Soraba	15	11	02	01	13	10
shikaripura	03	2	00	00	3	02
Hosanagara	12	4	00	00	07	6
Thirthahalli	12	8	01	01	10	07
	81	58	07	05	74	53

- Owners of the women entrepreneurs in the region are in the age group of 31-40 with 72% of contribution.
- Middle age women are the initiative taker who started their enterprises when they are in 31-40 age with 53% of holdings.
- Education Qualification of Women entrepreneurs does not have any relationship with the development of entrepreneurship is proved in this study. Majority of the crew having primary education background constituted 70% of enterprises.
- Nearly 55% of women professions are from arts background. Very less professional have commerce background.
- With 3 month experience in the line is presented by 63.79 % of entrepreneurs.
- Women entrepreneurs from General Category are more in number with 50% of contribution in small scale industries. The backward categories contribution is stands as 13% together.
- The region has unique feature with married entrepreneur's initiatives. Nearly 97% of married women took risk to step in to the profession as entrepreneurs.
- Women entrepreneurs having the urban background are more in the profession with 53% of contribution. Compare to rural women, urban women have more opportunity to enter the profession
- Family background and structure has its own impact on the development of women entrepreneurs in the region. Women from the nuclear family background occupied 73% in the profession.

- Business families motivated women entrepreneurs to join the crew of entrepreneurs profession and families annual income between 10,000/- to 25,000/- are more in the field.
- The location of the women entrepreneurs are centered in urban in more number.
- Parental land was the main reason for 91.37% of women to select the present location.
- Nearly 72% of women attended minimum 1 to maximum 3 in their carrier.
- The duration of the course is also matters a lot to women to take part in the process. Less than one month training programme attracted more number of women to participate in the course. International Journal of Advanced Research in Management and Social Sciences ISSN: 2278-6236 Vol. 1 | No. 3 | September 2012 www.garph.co.uk IJARMSS | 124
- Marketing skill improvement was the main focused issue and agenda for more women to attend the course.
- Non Government Organization provided more support in planning the unit, marketing strategy and effective and result oriented training is been provided by NGO's. Government Organization needs to be trained in the field.
- The enterprises profit is been hiking from year to year and it a singe of development
- Study recognized that women entrepreneurs are good at production, but they are poor in Market management, Labor grievance management. The new technologies available in the market also not known to them. The professional training programme is needed in this field
- Women agreed in 63.79% cases to be a home maker in the condition of less opportunity in the present line.
- Maximum number of women entrepreneurs are i.e., 87.93% of them are unemployed before setup their unit.
- The profession growth is accepted by 58 women entrepreneurs. Increases in graph, profit of the unit and employment is shown upper face in graph.
- Women have potential in production management with 100% contribution and financial management with 77.58% of control.
- Women having the vision that literacy provided them 100% opportunity to step in to the profession. Social liberty and freedom is a pushing facture for women to be in the present line and its strength of women.
- Most of the women around 87.93 % are happy with their present profession and they want to be in the same line.
- 3 p' sector is been developed as small scale sector and it has good opening to women wants to join the crew of women entrepreneur.

- There is no opening for women in electronic goods sector and, consultancy work also not been recognized as important one.
- The checks to start the unit was more from inlaws with 41.37 % and parents with 39.65 % in this case. Husbands are very supportive in 81% of cases in study area.
- Women are moderately struggling to handle dual role in 41.37 % of cases as home maker and entrepreneur

## Conclusion

Today's women have ventured into manufacturing, trading and service sector from the earlier days where they were limited only to the domestic jobs. The participation of women in the entrepreneurial activity makes them not only self - confident but also self - dependant. Thus, it provides them an opportunity of not only contributing to the economic development of the nation, but also enables them to give a better life to their family. The women make up for almost 50% of the population in India, however, only 10% of the firms in the MSME sector are owned by them. Hence, if supported, the women entrepreneurs can provide a much - needed boost to the economy by creating new employment opportunities. The women - owned firms have more than doubled from 1.02 million enterprises in 2001 – 2002 to 2.66 million in 2005 – 2006, the percentage of registered firms owned by women increased from 8.32% to 13.72%.

However, they face a number of barriers in the quest of achieving their ambition. They face social barriers right in the beginning of the start - up phase followed by the financial barriers. Market and skill related barriers make it more difficult for them to begin their entrepreneurial ventures. Barriers created by their own fears and attitude towards taking decisions for starting the business is another factor for the dismal percentage of women - owned enterprises. However, amidst a lot of difficulties, they have proven their ability to manage not only small businesses but also convert them into highly successful large industries. Biocon Pharmaceuticals is one such example. A proper environment with support from society, primarily their own family, and government can solve many of the issues and as such, government has rolled out several initiatives and schemes to help women entrepreneurs to overcome these barriers. Various initiatives have been taken in 7th, 8th and 9th five - year plans by making the women entrepreneurs a target group and developing schemes around this group. There are numerous schemes, wherein women receive additional benefits/concessions/assistance such as PMEGP; also M/o MSME is executing two specific schemes for women i.e. TREAD and Mahila Coir Yojana. Mahila Vikas Nidhi and Rashtriya Mahila Kosh were funds setup in accordance with the provisions in the 9th five year plan for providing financial assistance to the women entrepreneurs. Also, with higher education and increasing literacy rates, the view of the society is also changing towards venturing of women into entrepreneurial activities. In the constantly changing scenario, the government should not only spread awareness at a large scale about various initiatives for women entrepreneurs but also setup dedicated centres for helping women entrepreneurs. Also, a single window setup for women entrepreneurs staffed with well informed and skilled personnel could help the women entrepreneurs to manage the cumbersome

government procedures, manage tax related issues and complete legal formalities. Designing training programmes and workshops, more relevant to today's scenario along with programmes addressing needs of the women entrepreneurs at various stages of the firm's life cycle would immensely help them by equipping them with skills and knowledge required to create a successful firm.
