The middle layer of latex which is the bitter yellow sap. The outer thick layer of 15-20 cells called as rind. It is use for several skin disease like acne.

Keywords: Aloe vera, Herba, Formulation, Evaluation

Introduction: The Herbal plant aloe vera of maximum 100 cm in height and mature in 5 to 6 years. Aloe vera is derived from Arabic words ‘Aloe’ means ‘Shinning bitter substance’ and ‘Vera’ means ‘True’. It is used for host of purposes since the ancient Egyptians called plant of “Immortality”. It is also none as ‘Ghrit kumari’ in hindi. Aloe vera leaves is use for cure sunburns, burns and skin disease. Aloe vera soap is used to skin care like acne, wound healing and protect sunburn of skin.

Collection of Herbal plant Material:
The herbal aloe vera soap are prepared by various plants like Aloe vera gel, Olive oil, Coconut oil, sunflower oil, Castor oil etc.

Aloe vera gel:

Biological source: It is collected from dried latex of leaf.

Family: Lilaceae

Morphology of Aloe vera:

Height: 60 to 100 cm

Leaves: Thick and fleshy

Colour: Green to grey green

Width: 10 cm
Uses :

a) It is used to cure skin wounds.

b) It’s boiled juice to treat hair falls.

c) Aloe vera gel is used to protect radiation burn in skin.

Olive oil:

Biological source: It is liquid fat which is obtained for Olives.

Family: Oleaceae
Uses:

a) Olive oil is used to prevent skin ageing.

b) It is used as a moisturizer.

c) It’s used as a make up removal.

Coconut oil:

**Biological source:** It is obtained for matured coconut from Cocos Nucifera L.

**Family:** Palmae

**Morphology of coconut oil:**

- **Temperature** – Below 23°C
- **Melting point** – 23°C – 26°C
- **Soluble at 60°C** - Alcohol and highly soluble in choloform

![Coconut Oil](image)

**Uses:**

a) Coconut oil is used as a moisturizer.

b) It is used as a Body scrub.

Sunflower Oil:

**Biological source:** It is collected from the seeds of Sunflower.

**Family:** Asteraceae

**Uses:**

a) Sunflower oil is mainly used for cooking oil.
Castor Oil:

**Biological source:** It is obtaining from the pressing of seeds of castor oil plant (Ricinus Communis L.).

**Family:** Euphorbiaceae

**Morphology of Castor oil:**

- **Color** – Colorless
- **Odour** – Faint
- **Taste** – Acrid
- **Soluble** – Alcohol and highly soluble in chloroform

**Uses:**

a) It is used to promote to the skin health.

b) Castor oil is used to reduced Puffiness.
Ingredient used in the formulation of aloe vera soap:
