ABSTRACT:

The Moon's Cycle produces Physical and mental-emotional changes that correspond to Homoeopathic remedies. Homoeopathic remedies had peculiar aggravation times or amelioration times. Accordance to hours, days, weeks, months, years and Seasons. Dr.C.M Boger emphasised the importance of 'Time factor' and 'Moon Phases' in the action of drugs. Homoeopathic remedies acts in the various phases of moons like growing, full, waning and new moon. The Times which characterise the appearance and aggravation of the symptoms and their remedies.

KEYWORD: Homoeopathy, Moon

According to Scientific reviews, the full moon , it seems, changes the behaviour of human and animal minds. It has been observed that during full moon nights the moon creates a tidal effect (due to magnetic forces of earth and moon) on oceans, which is also 80/ water of the earth's surface. For many species the Moon's grow is clue that's crucial to their Survival. Lots of animals use lunar cycle to sync up when it comes to finding a mate. Triggered by the full moon, impalas roar, which in turn triggers all their female mates. Marine bristle worms live rocky shorelines, where they rise to the water's surface under the dim light of the new moon.

The moon seems to act like a signal that supercharges the worms desire to mate when the light at night is just right. Moon is just like a clock. It Transforms ecosystems.

The full moon is 100 times brighter than the new moon. This lets animal See their prey, forage, and navigate better. Moon is a satellite for this Planet. If someone is mentally disturbed on Full moon day, on a new moon day they get little more disturbed than usual.

When the moon takes certain positions it heightens whatever you are..... If you are joyful you will become more joyful. If you are angry you will become more angry. It enhances everything that you are...

The moon, of course has been known to have major influences on health; the synchronicity between the menstrual cycle and moon phases has been repeatedly verified; in addition history has long recorded the effect of moon phases on epileptics and psychotics. it is also an interesting fact that police and emergency crews of many major cities are now strengthened around the time of full moon because of well -documented increase of violence and accidents during that phase.

The moon has always fascinated mankind and holds a mystical place in the history of human culture. The Hindu ,islamic and partially the Hebrew calendar use the lunar cycles. so

many religions have embraced the lunar calendar. The gravitational powers of the moon and the sun combine to create tides on the earth's oceans. The gravitational effect is so strong that our planet's surface is stretched daily by this tidal effect. FOOTNOTE 7—Our earth, by virtue of a hidden invisible energy, carries the moon around her in twenty-eight days and Several hours.

Dr.C.M Boger wrote the book TIMES OF REMEDIES AND MOON PHASES. Dr.Boger emphasised the importance of TIME FACTOR and MOON PHASES in the action of drugs. This repertory mentions about aggravation and amelioration of complaints.

Conclusion:

The Moon has been known to have major influences on health. The Moon's Cycle produces Physical and mental-emotional changes that corresponds to Homoeopathic remedies.

Dr. C. M Boger emphasized the importance of 'Time factor' and Moon Phases in the action of drugs.

Homoeopathic remedies acts in the various phases of moons like growing, full, waning and new moon. The Times which characterise the appearance and aggravation of symptoms and their remedies.
