## “The Role Of Youth In National Integration”

*Dr.Jagadeesh Bidrakoppa*

*Asst.Professor of Political Science*

*Govt First Grade College Sagar*

### Introduction

Probably, our country is multi-religious ,however people of our country has a quality to accept religious and their customs. Were as now the day-today life is going on change when compared to the pastor ancient days. Earlier there was a bondage between one person to another through the might be from other religion other caste. They would like to think that there are children of “Bharath –Maate”.But now the belongings of of this India are Getting out of this matter and forgetting the Paths which are baned by our ansisters. Now they are humiliated by the media ,television shows etc. Then there will be ask a question or think about this How the people get humiliated ?. We can observe the stress or strain working condition is society for the completion purpose but the work pressure directly or indirectly affecting the pupil to their work-in-efficiency, talent and , knowledge and maily towards their mental ability.But the saddest part is that is that our younger generation is having a huge drawback in the field of this Unlity towards the nation. Our younger generation is busy at the electronic gadgets where as unless wasting their Valuable time.

**As to the topic “National Integration”.** I would like to share a recent incidence which had a sorrowest situation which we heard on Feb-14-2019, the ‘ Pulwama incident’ where the 40+ our soldiers were no more to our nation.”They Died”, which was a cunning plan of the Pakistan country. They doped a bomb towards the truck where the soldiers are travelling. Although after this our country has taken a revenge by the way of “Surgical strike” in the midnight.

Why I am stating this incidence here means , though the soldiers are ready to sacrificies their life to to country but our youth are not ready to spend a least od time to motivate others to the unity between people here not only the youth the entire pupil in the nation has to decide to change the atmosphere by the means of motivation by attend religious function other than that of their religion.

As the word Integration only states it meaning that The Unity a proverb Says that ‘Unity In Diversity’. For the better nation there must be a well and Supesticated weather or atmosphere. But the youth are not ready to create or not read to mingle with this atmosphere which is already existed.”India is well known by its high rated youth population”.Our India is a youth country, Nation of youths, But there is a lack of interest and hope towards the one on other.

Developing of National Integration or National Unity is bit easier to the youths. How means as our youths are in the time of education the seek to make a friendship and and in that they wish to make a best friend as one. Before the maturity or in the childhood. They wont think about any of the religion or caste to make a friendship they think only about the kind heart and like the caring and helping nature hoods. But after growing up they wish to make group and like with the favourism in the groups, as some of them wish to make their own religious group/gang to enjoy but the society it wan’t

apply to a groupism. If a public means, its only a public rather than that no matter will come, but our youths minded is now fully pensionable to the cinemas or movie sector. By watching the films they think that. I should also become like this, as now the script of the films are most of negative thing and has almost negative roles and now the films are in the path of politicsector, crime sector or directly to the Nations matter. It may be a positive or negative

Youths are not involving in the programs of socio-culture, skill development, mental development program, national awareness program which are conducting periodically. Our younger's generation is in the scope of entertainment, enjoyable life with more money and less work. Now at present the google seekers are 97.43% in whole world as a teacher but no one is ready to hear upon one onther, make conversation or to communicate with one onther. They are all busy in involving in their own world and that world is full of ambition to make money, name, status and to enjoy the whole life without the risk and work.

Role of the youths towards the unity is in the hands of the youth only, they are the king for their Kingdom but while comparing it to the unity towards the 'Nation' all the pupil or person are equal. There is no equality among any of the religion. Youth have to self motivate by themselves by confidence that we born to serve our mother and motherland. As a senior they have to motivate their friends and juniors and aware the dispute regarding the nation.

However, our India has rich in youth population voting power will be granted while the person get step in to the age of 18 years. If the power is given means there should be awareness that am the citizen of this country. I have to elect the capable person as a candidate. Now the political Glass is full of corruption. And the saddest thing is that there is no minimum qualification to stand or to compete in election. As once in newspaper the publisher published that the education minister Mr xx was a fail student in 10<sup>th</sup> and hadn't passen the SSLC exam but now he is a educational minister. And the same as above the health minister was a P U passed candidate that he has'nt known the full form of MBBS itself.

For the better nation there must be a minimum qualification level to stand in election or let us take a oath to elect the powerful candidate towards the constitution. Now the elections are against to the national integrations as dividing the citizen as caste, religious etc. And the parties of the elections are also became a divisions in religions.

If a person donate the fund towards the sports like cricket the younger generation would like to elect that person a area candidate. The tendency of the youth society is degrading towards the unhumanity. There is no curtacy among one another youth has the capacity to change anything in this nation. If all sudden they make oathto build better nation it will be surely possible because no matter is considered against the youth decision.

As this we can conclude that all the possibility is in the hands of the youth but the younger generation is not ready to utilize or to accept the current situation to over come from this illusion of civilism. The heads of the youth are burdened due to the electric appliances. And the educational system has to be changed as at present the education is simply seemed to be for educational purpose, there is no moral no ethic, no simplicity among one another. All will stand in front of the money by bow downning there head to only the mean is to compete and come across the good reputation.

*If all at once youth decide to take or to pay attention means there will be a huge or broad change will happen in the society. All the matter is everything in the hands of youth. If our youth get change means above 65% of the country will change.*

*As from the basic only every kid has to be trained up and to be motivated to overcome from all the disputes in personal and public sector causes.*

*At last I would like to suggest that each and every youth has to take initiative to serve the nation in a better manner by developing moral and compromising the other with the ethic and the pupil of this nation must be clearly aware by our constitutional amendments to survive in this nation by the good rights and thought.*
