

# Global Peace & Its Huddles

Bishnu Rimal,

PhD Scholar, Singhanian University.

## Abstract:

Violence and terror attack has become the essence of today's growing world. The human being has time and again fighting for this or that aspect in search of power and supremacy in the world. In modern world person has huge want of power and money then it uses to be in past. It is not hidden secret that many global war between the nation has been fought every now and then in want of get the upper hand in oil business or to create global treat by enhancing nuclear power. Problem regarding so can only solved if all the nation stands together in one common ground of global peace establishment not by voice but by act. Dream of global peace can be achieve only if countries around the world act on the core principle of UNO. Nearly one third investments in the world has been done either in the sector of enhancing nuclear power or for achieving its reach in oil business which is universal truth which nobody wants to accept. This paper therefore, will sincerely tries to open those curtains which has either been kept to hide some dirty secrets or to cover up such scandal. It will try to prove facts hovering around many war which has been done just to achieve mere power rather than for establishing global peace. Researcher here want to highlight those truths which has been revealed in some articles but has been cover up by many sources or has been diversify for hiding purposes behind the actual truth and will also tries to figure out the oil politics which has become major huddle for peace establishment.

**Keyword:** Global Peace, Oil Politics, UNO

## Introduction:

In ancient time, people use to fight for finding food and shelter and we still carry those instincts inside us only the purpose of fight has been change. In past violence has been done for survival but now after enhancement in our greed it has been for establishing supremacy and for suppression to others. No country in the world are now thinking about peace but if capable they are disturbing peace of other country and if the condition of country are not so good then they are suppressing their own nationals. After end of world war, people thought that violence has been ended but the series of mass killing has never stop whether it is done in the name of terrorism or in the name of stopping terror activities. The global peace meaning has either been denied or has

been used only for core benefit of some countries time and again. Firstly we have to understand what is global peace? Global peace means establishment of violence free environment where the people feel free from violence from air, land and water which mean the person should feel free to live in any place and feel free from any air, land or naval attack but every now and then various countries are producing weapons and missiles in the name of protection which ultimately will not end violence but create fear among the people. We have create multiple Hydrogen bombs and long range ballistic missile which can even destroy the world multiple times then how can we be assure that we are living in peaceful environment. If we just look at the annual fund spend by developed nation in their nuclear plant the core investment can easily end the problem of poverty in the world so how can we say that we have achieve ultimate peace after two great world war. Therefore, researcher has tries to provide sincere attempt to present some data regarding so in this paper.

### **Objectives:**

- To know about the global peace
- To analyze oil politics and countries benefiting from such activities.
- To addressed issue regarding investment in war by various nation.
- To ascertain the ways to establish ultimate peace.

### **Materials and Methods**

#### **Data collection and Analysis:**

The data are collected from reputed Journals, Newspaper, Articles and official publication of various research centres. Lots of website and government official site has been visited for analysing the data in proper way. After that data are studied one by one and filtered according to its effectiveness in research. Various graphs and tables published by the different research centre are used for analysis and justification of facts.

#### **Methodology**

The qualitative method of data analysis is used for the research since the question related to global peace is subjective question so the data are collected from various source. Usually data collected are narratives and descriptive in nature so thematic ideas can only provide solution therefore, qualitative method proves to be

best method for this research. Additionally, in this method limited number of respondents having in-depth knowledge of an issue are studied and purpose are kept in mind so this methodology is best for research.

## **Facts and figures:**

### **Korean War:**

In Korean War (1950-1953 AD), nearly 800,000 people loss their life which include 36,000 American Soldiers; 620,000 South & North Korean Soldiers and 1,600,000 civilians (Amadeo, 2019). This war is also known as war fought for establishing peace with composing differences in fashion wanted by two power hub of world without a clear victory satisfying the power ego with brutal and futile battle (Wright, 2013).

### **Vietnam War:**

The civil war which began in 1959AD and ended in 1975AD killed 58,220 American soldiers with human casualty in Vietnamese side of about 1.1 million in North Vietnam and 250,000 in South Vietnam and about confirmed copse count death of 2 million civilians still is one of the worst nightmare happen after World war II (Amadeo, 2019). Soviet Union benefit from this war firstly they benefit by selling large volumes of military hardware and secondly communism spread in another country.

### **Iraq War:**

With cost of more than 1 million Iraqis life and 4,480 U.S. Soldiers, Iraq war is one of the bloodiest battle (Jenkins, 2013). This war is the true reflection of how greed can cause massive destruction. It is unenvied facts that Iraqi war was war of choice because Iraq had not attacked US or its allies and there was no any concrete proof that Iraq was planning to attack any other nations (Jenkins, 2013). Although, reason for attack officially was to remove any mass destructive weapons but no such things were ever found. The reason behind the war is to have reach on oil reserve, control by Iraqi government. USA want to get supremacy in oil business which is the true most commanding motive behind war and is related to oil politics (Hinnebusch, 2007).

### **Syrian War:**

According to the Syrian observatory for Human Rights, which is constantly monitoring on activities in Syria has stated the confirmed death of 367,965 people where 192,035 people who are missing and presumed to be death are not included. Therefore, research shows the staggering figure of about 500,000 human causality by

2018. Additionally, almost 1 million people are injured and more than 12 million people are forced to flee away from their motherland (Erickson, 2018). The reason for this devastating war is Assad's being allies with Iran who want Syrian weapons to move to Middle East for proxy militias but this upset Iran's rivals in region such as Saudi Arabia and Turkey (want to invade Kurds) which are investing on Anti-Assad rebels so war although seems to be internal but all has hidden support for fulfilling their benefits (Erickson, 2018). From Syrian war, Israel has conflict with Syria for so long time for issue regarding Golan Heights (where oil and gas resources are found by exploration carried out Afek Oil, US Company) and is enemy state but after war now Israel can easily enter in Syria (Israel Benefits Of Syrian Chaos, 2019). US can benefit by establishing its permanent presence in Syria and blocking Iran and Lebanese to take probable Oil reserve present in area. While Russia support Assad who is ally of Middle East and can keep its military airbase situated in Latakia safe.

### **Gulf War:**

The Gulf war started in 2<sup>nd</sup> August, 1990 and ended in 28<sup>th</sup> February, 1991 AD. for about nearly 6 months, 3 weeks and 5 days. It is war where Gulf countries like Iraq, Kuwait, Saudi Arabia, Israel and other countries of Persian Gulf involved which causes massive destruction of human life and property. In this blood battle thousands of life are lost the core purpose of Gulf hand is just to have upper hand in oil so this war can be addressed as the war for power establishment. Nearly 100,000 people lost their life including civilian and army personnel in this war.

### **Oil Politics:**

Oil also known as black gold is the cause of many conflict from the research done by team of UK which involved many universities like Portsmouth University, Warwick University and Essex University which look at 69 countries concluded that two-thirds of the war happened between 1945 to 1999 AD are for intervention on countries just to get upper hand on oil. The research also suggest that outsider join war of any countries only if they are benefited financially from such war. Many examples are given to prove such facts some of them are: US involve in Angola's Civil war from 1975 AD to establish autocratic states in oil-rich regions, similarly UK involve in Nigeria's Civil War in 1967-70 just to fulfil thirst for oil and Soviet Union Involve in Indonesian war in 1958 and Iraq in 1973 just to gain its hand on oil reserve (Smith, 2015). Not only that,

conflict in Niger Delta from 2004 to till date is also the result of oil politics as well as Russian involvement in Syrian civil war is also due to oil. US has also spending lot on Persian Gulf just to protect oil. Lastly, if all the countries of world want global peace then going to war for oil is unnecessary, expensive in blood and dangerous for safety of people.

## Conclusion:

Many research done by scholars and various fact after elaborating finally dream of global peace seems to be far from reach until and unless all the countries in the world come on the common ground and take strong stand on soul aim of establishment of peace without any greed and thirst of oil. All the war which has seen huge loss of life and property can be end only if few so called developed nation has kept humanitarian aspect upfront and has kept their hunger of being on top of world aside. World being universal playground for many generations to come we have to overcome the greed and thirst of power and always has to welcome the steps of establishment of peace as recently happen between North Korea and US. Furthermore, from many research researchers can suggest that war has been cause of all terror activities that has been happening every now and then. The goal of global peace which means freedom to breath without having fear from land, water and air can only happen if we stop producing weapon and establish environment free from fear. Ultimately, billions of investment that various countries are investing for war can be saved and can be utilize for end of poverty and illiteracy which are key factors for rise of terrorism.
