

A PROJECT ON STOCK MARKET

Bandugula Mounika, Master of Business Administration,

Mrs. J. Kalpana, Assistant Professor, Department of Master of Business Administration,

Malla Reddy Engineering College and Management Sciences, Medchal, Telangana – 501401.

1. INTRODUCTION:

Stocks, stock, or a company or trade stocks and other securities for security, and merchants to develop "tools" are provided by the companies.

UCITS and other investment products are the market value of securities issued by legitimate. In particular, for the sale of the securities market, it should be declared. Usually, at least, the accounting, there are rocky, but as a small business and market gains and losses, as is the modern electronics industry, because it is not on the issues to contribute to early actions, and securities can be found in the primary and secondary market trading by definition. The Bursa Securities market is very important. Demand for the securities market and offer various free market, as the stock can see the value (stock price), and for several reasons.

Usually, they are not offered through the portion of the securities market, as well as the need to develop the securities market. Such efforts, however, do not have permission or the market. This method of trading is very common.

Increasingly, the stock is on the global security market.

Trade-market society and values are large. Shares, stocks or other securities exchange, purchase and sale

- What is the principle behind the work of the bags?
- The function of the market and the choice of what?
- I know I have a great exchange

How and why the stocks trade exchanges on the Internet, understanding will help you make the right decision. Tracking NYSE and NASDAQ every night, and you understand the numbers of the securities market is another good investment, aid helps to be listed.

2. LITERATURE SURVEY

The population of the capital

Capital investments in equities and negotiation of bonds in the stock market. He also called for the company's participation in the purchase of capital or property. Capital investment funds generally must contribute to the company's assets. The risk

with this type of investment, the investor can get. The investment of capital in companies, as well as the package, is called payment by the company. Capital investments, as in some cases, the company can benefit from the energy savings it can control. To understand the investments that are needed to analyze the technical and policy. Future trends in the insurance market in the stock market before you learn all the important information, the project yields an asset with a cost analysis basis. Annual reports, industry research data, as well as the economic and financial environment, capital investment, as well as basic information are entered.

Funds and public funds are not included

Money is held by a person or another investment is central, but the steps are controlled and managed by the top management. The stock immediately released, was not ready to sharpen large money from private investors; the other side will be used.

The head of the main advantages of mutual funds will allow professional advice from individuals.

The main contribution of this loss must be paid for

Demographic Profile of investors

Analysis & Interpretation Is a good contribution to the population at the age of 40 years and found

and can not guarantee suitable for all investors. In this situation, many investment funds perform more thorough and at the same time can reduce the risk.

Money, important and very simple way is the best because the equity market and the money do not require contributions

In addition to contributing funds early start can only be explained by a group of funds.

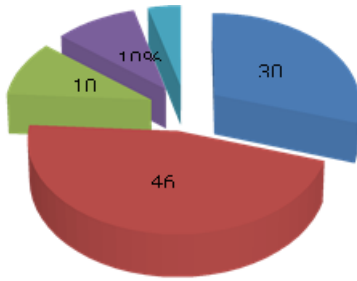

Therefore, investment funds, investment from the sale of one participant. Many who gave great advantage to contribute, through a variety of investments, However, I cannot contribute to the good work, the ratio of the risk/benefit, but at the beginning of another, more common currency.

Best kind of range values than the cost of a few coins. Coined money with money is clear so you can reach the hundreds. This amount will be donated if the investigation can take weeks, but it will contribute to more funds, and this can be done in a few hours.

3. DATA ANALYSIS & INTERPRETATION

that 60% of 20-40 years. He received the education of respondents, while 50% and 50% of students graduating. More respondents, in another, 50% of the beds range from 20,000-40,000 per month

income. The bed was contributed between 20,000-40,000 incomes by age 40.

Analysis & Interpretation The majority, 45%, and the most important contribution to measures such as the specific responsibility for contributing 25%, 15%, and contributing 10% to the pie chart, the picture are closely related. Statement 3.To know the type of investment option the person has been investing Table No.6.3 Type of investment option the person has been investing

4. FINDINGS OF THE STUDY

The results of the study are as follows:-

- Maximum light inverters than all investment options.
- Investors in the same way. Road trip with other maximum capital contributions to security and investment funds for investment.
- Investors and the maximum contribution to their rapid growth.
- Contribute to self-determination and the unity of contributing by friends and family.

- The reasons that explain the growth of taxes and are subject to capital risks and gains, and that it is popular due to all investment opportunities.
- A large number of entrepreneurs to reject 15% of annual income.
- Investor's maximum annual allocation.
- Various forms of investors to contribute to their freeway.
- Investors have a maximum investment in any policy.
- The important contribution is to influence the decision to return.

5. CONCLUSION

Central India is one of the oldest in Asia. History goes back almost 200 years ago. East India Company is the largest institution on the day and was used until the end of the century; it is dedicated to loan guarantees approved. Each different type of contribution of other people to a variety of financial objectives depends on variables that are unique to each person since they assume the risk and capacity of earnings and future style.

If the purpose of the donation and the financial point of view and have begun to change, as well as a special contribution. Investors know the maximum contribution of all parameters..
