

A STUDY OF CAPITAL MARKET

Mukthala Maninder, Master of Business Administration,

Dr. M Pavani, Assistant Professor, Department of Master of Business Administration,

Malla Reddy Engineering College and Management Sciences, Medchal, Telangana – 501401.

1. INTRODUCTION:

Employment-based on the concept of "capital markets" analysis "Joshi & Joshi Pvt. Ltd." Functional, primary and secondary data based on participation.

My teacher is the main purpose of researching and learning the capital market concept of the "Capital Market" project and contributing to the development of the capital market to understand the portrait of the decision.

Contribute to the study of variables based on research, know your ideas, market capital, and other investments, and are trying to provide public information.

The idea is to adopt best practices and research on capital markets to eliminate back problems.

The creation of a modern electronic computer database system for capital market commerce is almost ready to receive, but most of the financial sector, or with the Minister of Finance in government agencies and public institutions, can be accessed directly by people, but some may be taken. Most of these systems, there was total capital is only a small part. Instruments in the stock market system, investment banks, and government agencies.

2. LITERATURE SURVEY

The capital market is dominated by regulators and architect by independent organizations:-

The reason for putting the need to avoid the cost of fraud and lying. Financing the crew as well as handling and financial services, to secure the rights

for reduced borrowing costs and application devices now.

Despite increased energy costs and global warming, many companies are starting to benefit from green technology. The government and financial institutions to support the development of the business and to develop a network of green, rm1.5billion green, green technology, and methods. The green industries have the potential for future growth and at the same time to change the technology used today is a new way.

financial institutions to improve the delivery of development and delivery of:-

China and exports and exports to the Chinese market in favor of regional market growth. As a member of international trade and the global economy and the promotion of domestic consumption and support the opposite.

Country initiatives and several companies working for alliance:-

The purpose of the company is the biggest, growing, is to start. Malaysia is the largest exporter of coconut oil. With the unification of the country, and the cotton industry for a long time to increase production capacity, not enough money to develop the business.

Finance International foreign exchange market, the domestic currency will help to strengthen the domestic market of this:-

It is caused by the rapid industrialization and manufacture of electronics for stable,

communication and compensated by KLSE and development within business investment opportunities.
