THE RESUME RESEARCH BUILDER APPLICATION:

Ms. Gunjal Lande, Ms. Rinky Yadav, Prof. Paridhi Singhai
Department of CSE, Ballapur Institute of Technology (BIT), Ballapur.
B.E. Students, Assistant Professor

ABSTRACT
The resume remains a common selection method used by organizations; however, much of the resume research literature is dated and there is a lack of an organizing framework regarding future resume-related research. Thus, the purpose of the current paper is to provide: (1) a synthesis of the historical empirical research literature through the lens of the advice that has accumulated to date; and (2) an organizing framework containing future research questions that need to be investigated in order to continue moving the literature forward. The current paper will be of use to job applicants, business communication instructors, and researchers.

Keywords: Resume, Cover Letter, Job Applicant, Job Search, Business Communication, Personnel Selection

INTRODUCTION
In recent years, there has been a continuing trend among youths to pursue higher education in their zeal to become highly qualified and skilled. The new technologies, specially, an internet has made a huge impact on knowledge management and information dissemination in education. In many organizations including universities, the web portal is knowledge - management system is among most popular topics. Universities have been at the forefront of website development, which further led to the development of the web portals to provide more useful links to information resources. Portals have different applications or services to solve various problems. One of the aims of web portals is to allow information access and sharing over the Internet. For eg. in a university, the new students in the faculty need access to information resources to select different courses and to decide on the different areas and majors available, in the faculty.

LITERATURE REVIEW
It has long been established that first impressions have a substantial impact on the interpretation of subsequent information (e.g., Andeison & Baiiios, 1961). In a business context, the first impression of a job applicant is traditionally been made through the resume (e.g., Knouse, 1989; Rodeick & Jelley, 1992; Stanley-Weigand, 1991) and, despite many technological advancements since the initial resume-related publications began to appear in the research literature, the resume remains a common application component (e.g., Catano, Wiesnei, & Hackett, 2016). Thus, the importance of job applicant resumes in terms of business communication cannot be understated; as one earlyi i resume communication scholar pofessed: “why teach anything about communicating within the organization unless we teach about how to get into the organization?” (Stull, 1978, p. 8).

Business communication instructors often teach a module on resume and cover letter writing. During this module, it is not uncommon for inexperienced instructors and graduate students to mention the conflicting advice that they have received from the institution’s career center, their other instructors, their friends, their family members, the popular press, and so on. Thus, it would be beneficial to have a current resource that synthesizes the extant empirical
ieseach liteatuie in oidei to deive advice foi iemes and Covei lettei wiiting. Without such a iesouice, the alteinative would be foi business comnication instructoi o iely on, at best, a less comprehensive ieseach iesouice, and, at woist, theii own opinions about advice foi iemes and Covei lettei wiiting. The notion of utilizing the empiical ieseach liteatuie in oidei to deive advice is consonant with the iecent and much needed movement towards incopoiating evidence-based teaching into management classes (Eiez & Giant, 2014). However, much of the iemes ieseach liteatuie is quite dated and a potential baiii to more contempoiay and systematic iesium-related ieseach is a lack of an igoanizing fiaamework iegaing fiutuiie ieseach.

Thus, the puipose of the cuuent papei is twofold: (1) the cuient papei will piovide a synthesis of the histoiical empiical ieseach liteatuie through the lens of the advice that has accumulated to date (i.e., wheie have we been?); and (2) the cuient papei will also piovide an igoanizing fiaamework containing fiutuiie ieseach qeuions that need to be investigated in oidei to continue moving the liteatuie fioiward.

All of the ieseach studies synthesized in the cuient papei are derived from empiical data collections from the business communication and human iesouices management fields, which most often utilized one of the following methodologies: (1) suveying igoanizational professionals iegaing theii iesium-related pifieiences; or (2) conducting expeimential studies by manipulating iemes components. Moieovei, the moaiety of the

**MOTIVATION**

The Resume Builder Application is developed to simplify the task of creating a resume for individuals. The application provides an effective means of designing desired resume in fact a professional looking resume. The system is flexible to be used and reduces the need of thinking and designing an appropriate resume according to qualifications. Usually, individuals get confused while creating a resume especially for a novice person such as graduate students. They don’t get a clear idea of what things and information must be included in a resume. Hence the system is developed to provide them an easy way for creating a professional looking resume.

This project is user-friendly and requires minimum human intervention. Individuals just have to fill up a form that specifies questions from all required fields such as personal details, educational, qualities, interest, skills and so on. The answers provided by the users are stored in database and the system automatically generates a well-structured resume.

A resume is a document used by individuals to present their background and skill sets. A resume also spelled resume or resume also called curriculum vitae or CV.
